What is this product?

Type

Ordinary shares in a closed-ended investment company registered in Scotland, with Investment Trust status, which is listed on the London Stock Exchange. Shares of Standard Life UK Smaller Companies Trust plc (the "Company") are bought and sold via markets. At any time, the price you would pay to acquire a share will normally be higher than the price at which you could sell it. The price may be at a premium or discount to the net asset value of the Company.

Objectives

To achieve long-term capital growth by investment in a diversified portfolio consisting of around 50 individual holdings which will be mainly UK-quoted smaller companies.

No holding within the portfolio should exceed 5% of total assets at the time of acquisition.

The Company can borrow to invest and will operate between holding between 5% net cash and 25% of net gearing (at the time of drawdown) in normal market conditions.

The Company borrows in order to purchase assets, and this may magnify any gains or losses.

The Directors have set additional guidelines in order to reduce the risk borne by the portfolio:

- Companies with a market capitalisation of below £50m should not represent more than 5% of total assets.
- Companies involved in "Blue Sky" products should not represent more than 5% of total assets.
- No more than 50% of the portfolio can be invested in companies that are constituents of the FTSE AIM Index.

Intended retail investor

- Suitable for investors with basic investment knowledge.
- Suitable for investors who understand the basics of buying and selling shares in stockmarket listed companies and the way these shares are valued.
- Suitable for investors who can accept large short-term losses.
- Suitable for investors wanting a return (growth) over the longer term (5 years) but with easy access to their cash.
- The Company should form part of a varied investment portfolio.
- Suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

Term

The product has no maturity date and can only be wound up with the consent of shareholders. Aberdeen Standard Fund Managers Limited cannot wind up the Company.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Company is not able to pay you.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk

Higher risk

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact your ability to sell your shares.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Further information on risks are detailed in the Company's Annual Report available in the literature library on https://uk.standardlifeinvestments.com/consumer/funds/investment_trusts/index.html

Performance Scenarios

Investment £10,000

		(Recommended holding period)		
Scenarios		1 year	3 years	5 years
Stress scenario	What you might get back after costs	£6,065	£4,022	£2,960
	Average return each year	-39%	-26%	-22%
Unfavourable scenario	What you might get back after costs	£8,639	£8,897	£9,708
	Average return each year	-14%	-4%	-1%
Moderate scenario	What you might get back after costs	£11,162	£13,835	£17,148
	Average return each year	12%	11%	11%
Favourable scenario	What you might get back after costs	£14,299	£21,332	£30,035
	Average return each year	43%	29%	25%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your broker, advisor or platform. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Company is unable to pay out?

As a shareholder of the Company you would not be able to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay any dividends due to you, or if it were unable to pay any amounts due to you on the winding up of the Company.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment £10,000
