This key investor information is accurate as at 14 March 2022.

## What is this product?

Type	Hansa Investment Company Ltd has two classes: the Ordinary shares, and the 'A' non-voting Ordinary shares. They differ only in that the 'A' shares do not have voting rights. They trade separately on the London Stock Exchange, giving rise to different share prices.
Strategy	The objective of the Company is to invest in a portfolio of quoted and unquoted special situations, many of which may not normally be available to the general public, with the objective of achieving growth of shareholder value. By the very nature of special situation investments, the opportunity to invest in them will arise at any time but often not for long periods. Sometimes a number of opportunities may arise at the same time. Any single investment may, on occasion, constitute a significant proportion of the portfolio and/or that of the company concerned. The investment strategy of the Company has evolved over time, but it has always been managed with a strong focus on seeking out undervalued investments.
Intended Investor	The target investors are institutions and individual retail investors.
Maturity	There is no fixed maturity date. There is no ability for the Company to terminate shareholdings of investors in the Company unilaterally or automatically.

## What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level and poor market conditions are unlikely to impact the capacity for you to receive a positive return on your investment.

The following are some of the other risks materially relevant to the PRIIPs which are not taken into account in the summary risk indicator:

Typically, the price you pay for a share will be higher than the price at which you could sell it. The investment approach may produce returns which are not replicated by movements in a market index.

The Company has a strategic stake in Ocean Wilsons Holdings. The Company has broadened its (non-fund) equity exposure to include global equities. Equity exposure is also achieved through investment in funds managed by third party managers with whom we have relationships through Hansa Capital Partners' activities.

**What are the risks and what could I get in return? (continued)**

Performance Scenarios Investment £10,000		1 year	3 years	5 years (recommended holding period)
Scenarios				
<b>Stress Scenario</b>	What you might get back after costs	£7,805	£6,435	£5,599
	Average return each year	-22.0%	-13.7%	-11.0%
<b>Unfavourable scenario</b>	What you might get back after costs	£9,276	£9,309	£9,606
	Average return each year	-7.2%	-2.4%	-0.8%
<b>Moderate scenario</b>	What you might get back after costs	£10,482	£11,497	£12,609
	Average return each year	4.8%	4.8%	4.8%
<b>Favourable scenario</b>	What you might get back after costs	£11,811	£14,156	£16,504
	Average return each year	18.1%	12.3%	10.5%

This table shows the money you could get back over the next 5 years (recommended holding period), under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What happens if Hanseatic Asset Management LBG is unable to pay out?**

As a shareholder of a listed company there is no compensation or guarantee scheme in place to offset any loss incurred, including in the event the Company becomes insolvent. A default by the Company or any of the underlying holdings could affect the value of your investment.

**What are the costs?**

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

**Table 1: Costs over time**

The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios (£10,000)	If you cash in after 1 year	If you cash in after half recommended period of 5 years (after 3 years)	If you cash in at the end of the recommended period of 5 years
Total costs	£198	£605	£1,028
Impact on return (RIY) per year	1.98%	1.98%	1.98%

## Hansa Investment Company Limited Ordinary Shares

### What are the costs? (continued)

**Table 2: Composition of costs**

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

<b>One-off costs</b>	Entry costs	N/A	The impact of the costs you pay when entering your investment.
	Exit costs	N/A	The impact of the costs of exiting your investment when it matures.
<b>Recurring costs</b>	Portfolio transaction costs	0.18%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1.80%	The impact of the costs that we incur each year for managing your investments.
<b>Incidental costs</b>	Performance / other incidental fees	0.00%	This product does not have a performance fee and there are no other incidental fees.

### How long should I hold it and can I take my money out early?

**Recommended holding period: 5 years**

This product has no required minimum holding period but is designed for long term investment; you should be prepared to stay invested for at least 5 years.

### How can I complain?

If you are not satisfied or have a complaint this should be directed to the Board of Directors, Hanseatic Asset Management LBG, 1st Floor, Tudor House, St Peter Port, GY1 1DB, Guernsey.

### Other relevant information

The cost performance and risk calculations used in this document follow the methodology prescribed by EU rules. Further documentation such as the product's latest prospectus, annual reports and fact sheets are available online at [www.hansagr.com](http://www.hansagr.com). Depending on how you buy these shares you may incur other costs, including broker commission, platform fees and Stamp Duty.
