What is this Product?

This product is a closed-end Investment Company incorporated in England and listed on the London Stock Exchange.

This product invests in an internationally diversified portfolio of publicly-listed securities (ordinary shares in companies and bonds listed on an exchange) and unlisted securities (instruments not traded on an exchange) and private equity (direct investments into companies rather than via stock holdings), with the objective of securing long-term growth in capital and income. There are no specific geographic or industry sector exposure limits. A maximum of 5% of the portfolio value may be invested in unlisted securities, excluding private equity investments, and long-term exposure to private equity will not exceed 20% without approval from shareholders. The Company has both short and long-term credit facilities in place.

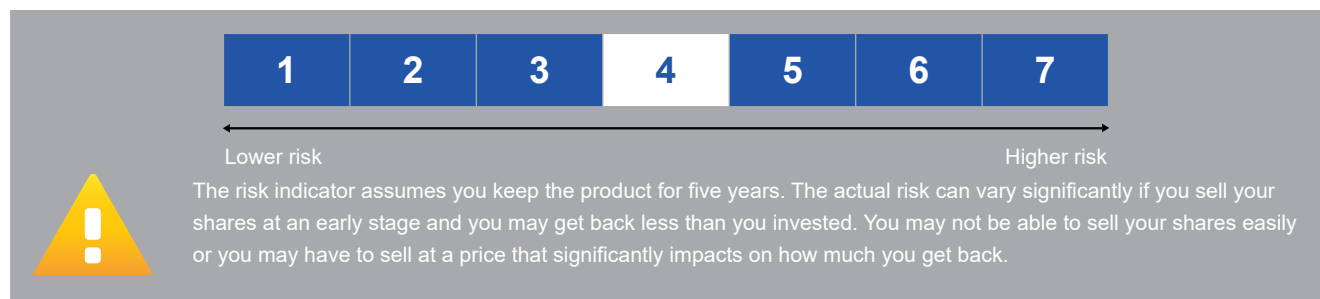

Derivatives (investment contracts between the Company and counterparties, the values of which are derived from one or more underlying assets) may be used for income enhancement and efficient portfolio management. Borrowings, which may be short or long-term, in sterling or foreign currencies, would normally fall within a range of 0% to 20% of net assets.

This product is intended for UK retail and professionally-advised private clients that are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return.

The product has no fixed term or maturity and cannot be terminated without a shareholder vote.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 4, which is a medium risk class. This rates the potential losses from future performance at a medium level. In periods when market conditions are poor, the value of your investment may fall and may impact the amount you get back in the long term.

In addition to market risk and risks introduced by way of regulation, this product also carries interest rate risk; funding risk; credit risk and foreign currency risk.

The value of your investment can go down as well as up. You may lose some or all of your investment. This product does not provide any protection from future market conditions and regulatory changes. There can be no assurances that the objective of the product will be achieved or that dividend distributions will continue to be made. The use of gearing can enhance returns to investors in a rising market, but if the market falls the losses may be greater.

What are the risks and what could I get in return? (continued)

Assuming you invest £10,000, this table shows how your investment could perform and what you could get back over the next 5 years under different scenarios. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past but are not an exact indicator. What you get will depend on how the market performs and how long you keep the investment. Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

The figures shown include all the costs of the product itself, where applicable, but do not include all the costs that you may pay to your advisor or plan manager, or local transaction taxes.

What happens if the Company is unable to pay out?

The Company's shares are listed on the London Stock Exchange. Should the Company be liquidated, the amount you receive for your holding will be based on the value of assets available for distribution after all other liabilities, but before shareholders, have been paid. Shareholders in this company do not have the right to make a claim to the Financial Services Compensation Scheme in the event that the Company is unable to pay out.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown below are the cumulative costs of the product itself depending on how long you remain invested. The figures assume you invest £10,000. The figures are estimates and may change in the future. The person selling or advising you about this product may charge you other costs. If so, that person will provide you with information about those costs and show you the impact that all costs will have on your investment over time.

Investment £10,000			
Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at 5 years
Total costs	£110	£359	£648
Impact on return (RIY) per year	1.01%	1.01%	1.01%

What are the costs? (continued)

	Carried interests	N/A	

How long should I hold it and can I take money out early?

There is no minimum or maximum required period for investors to hold shares in this product, but the shares may not be suitable for investors intending to hold them for less than five years. Investors may sell their shares at any time without penalty through a broker, private investor plan administrator or adviser.

The sale price will be determined at arms' length based on trading prices at the time on the London Stock Exchange and will not necessarily be equal to the net asset value per share of F&C Investment Trust PLC. The share price is updated regularly on the website www.fandcit.com. Market values may go down as well as up over short and long periods and so investors should invest with a view to long term returns. The amount investors get back will be influenced by the market factors at the time of sale and by the charges levied by the broker/plan manager. If you sell your shares before the end of the recommended holding period you may increase the risk of receiving back less than you invested.
