

## Purpose

This document provides you with the key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

Name of product:	Boost FTSE 250 2x Leverage Daily ETP	Regulator:	UK FCA
Name of PRIIP Manufacturer:	WisdomTree UK Limited	Name of the Issuer:	Boost Issuer PLC
ISIN:	IE00B94QKJ52	Published Date:	26/06/2019
Phone number:	+44 (0) 2038246020		
Website:	<a href="http://www.wisdomtree.eu">http://www.wisdomtree.eu</a>		

## What is this product?

### Type

An English law governed, uncertificated, registered, collateralised exchanged-traded note linked to the FTSE 250 Daily Leveraged RT TR through swap arrangements ("Swaps") entered into with eligible swap providers ("Swap Providers").

### Objectives

The objective of this product is to track the FTSE 250 Daily Leveraged RT TR index, the "Index", providing two times the daily performance of the FTSE 250 Net TR index (the "Benchmark"), adjusted to reflect fees and costs inherent to maintaining a leveraged position in stocks.

For example, if the Benchmark rises by 1% over a day, then the ETP will rise by 2%. However if the Benchmark falls by 1% over a day, then the ETP will fall by 2%. In both cases excluding fees and funding costs.

Holding this product for more than one day is likely to result in a return which is different to 2 times the return of the Benchmark over that holding period. This difference, called the "Compounding Effect", is caused by the product's daily leverage rebalancing, and is magnified by more leverage and longer holding periods. Compounding may have a positive or negative impact on the product's return, but tends to have a negative impact the higher the volatility of the Benchmark.

You may trade this product on various stock exchanges at your own discretion. You may lose the full value of your initial investment, but you will not lose more than your initial investment.

### Intended Retail Investor

The product is intended for basic retail investors who: (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for capital guarantee; (ii) have specific knowledge or experience of investing in similar products and in financial markets; and (iii) seek a product offering an exposure to the performance of the underlying asset(s) and have an investment horizon in line with the recommended holding period stated below.

### Term of the PRIIP

This product does not have a fixed term. The term will depend on how long you choose to hold the product however, the final maturity date is 30 November 2062. Boost Issuer PLC is entitled to terminate this product unilaterally.

## What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product. We have classified this product as 6 out of 7, which is the second highest risk class. It rates the potential losses from future performance, based on past performance, at a high level.

Losses will be magnified by leverage. Performance may suffer when the market is volatile.

Be aware of currency risk. If you buy this product in a currency different than the currency of the Benchmark, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

**Boost Issuer PLC Short & Leveraged Exchange-Traded Products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure.**

## Performance Scenarios

Investment £10,000		
Scenarios		One (1) day (Recommended holding period)
Unfavorable Scenario	What you might get back after costs	£9,911
	Average return (%)	- 0.89%
Moderate Scenario	What you might get back after costs	£10,040
	Average return (%)	0.40%
Favourable Scenario	What you might get back after costs	£10,046
	Average return (%)	0.46%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor or broker. The figures do not take into account your personal tax situation, which may affect how much you get back.

## What happens if Boost Issuer PLC is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. This means that if Boost Issuer PLC is unable to pay out, you may lose all of your investment. Since the ability of Boost Issuer PLC to pay out depends on receiving the amounts due under the product from the Swap Providers under the Swaps, it receives from the Swap Providers daily assets as collateral (the "Collateral") for such obligations with a value equal to or in excess of the value of the daily price of the product. If the Swap Providers are unable to pay Boost Issuer PLC, its ability to pay out will be limited to the amounts realised from the Collateral, as further explained in the Prospectus.

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are cumulative costs of the product itself over the recommended holding period. The figures assume you invest £10,000. The figures are estimates and may change in the future.

## What are the costs?

### Costs over time

Investment £10,000	If you cash in after One (1) day
Total costs	£0.56
Impact on return (RIY)	- 0.01%

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## Composition of Costs

The table below shows:

- the impact of the different types of costs on the investment return you might get at the end of the recommended holding period
- the meaning of the different cost categories

This table shows the impact on return per year			
One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.80%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.60%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0.00%	The impact of the performance fee.

## How long should I hold it and can I take money out early?

Recommended holding period: One (1) day. Holding this product for more than one day is likely to result in a return which is different to 2 times the return of the Benchmark over that holding period. The Compounding Effect may have a positive or negative impact on the product's return, but tends to have a negative impact the higher the volatility of the Benchmark.

## How can I complain?
