What is this product?

Type

An English law governed, uncertificated, registered, collateralised exchanged-traded note linked to the FTSE MIB Banks 15% Capped Net Tax Index through swap arrangements ("Swaps") entered into with eligible swap providers ("Swap Providers").

Objectives

The objective of this product is to track the FTSE MIB Banks 15% Capped Net Tax Index (the "Benchmark"). The index is composed of the constituents of the FTSE MIB Index which are classified as "Banks" in accordance with the Industry Classification Benchmark rules or as otherwise determined by the index administrator. The index is market capitalisation weighted after adjusting for float, with individual constituent weights capped at 15% following the methodology of the FTSE MIB Index.

For example, if the Benchmark rises by 1% over a day, then the ETP will rise by 1%. However if the Benchmark falls by 1% over a day, then the ETP will fall by 1%. In both cases excluding fees.

You may trade this product on various stock exchanges at your own discretion. You may lose the full value of your initial investment, but you will not lose more than your initial investment.

This product is intended to be marketed to investors who are prepared to accept high risk with their investment, and who understand the risks associated with the underlying assets.

Term of the PRIIP

This product does not have a fixed term. The term will depend on how long you choose to hold the product however, the final maturity date is 30 November 2062. Boost Issuer PLC is entitled to terminate this product unilaterally.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product. We have classified this product as 6 out of 7, which is the second highest risk class. It rates the potential losses from future performance, based on past performance, at a high level.

Be aware of currency risk. If you buy this product in a currency different than the currency of the Benchmark, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

What happens if Boost Issuer PLC is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. This means that if Boost Issuer PLC is unable to pay out, you may lose all of your investment. Since the ability of Boost Issuer PLC to pay out depends on receiving the amounts due under the product from the Swap Providers under the Swaps, it receives from the Swap Providers daily assets as collateral (the "Collateral") for such obligations with a value equal to or in excess of the value of the daily price of the product. If the Swap Providers are unable to pay Boost Issuer PLC, its ability to pay out will be limited to the amounts realised from the Collateral, as further explained in the Prospectus.

The Reduction in Yield ("RIY") shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are cumulative costs of the product itself over the recommended holding period. The figures assume you invest €10,000. The figures are estimates and may change in the future.

What are the costs?

Costs over time
