

## Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product

<b>Fund Name</b>	<b>Polar Capital Global Financials Trust plc</b> (the "Company")
<b>Share Class</b>	C Shares (the "Shares")
<b>ISIN</b>	GB00BNG2HN26

The product is manufactured by Polar Capital LLP (the "Manager"). This Key Information Document is issued and approved by the Manager. The Manager is authorised and regulated in the UK by the Financial Conduct Authority. Further information is available at [www.polarcapitalglobalfinancialstrust.co.uk](http://www.polarcapitalglobalfinancialstrust.co.uk) or by calling 020 7227 2700. This key information is accurate as at 12 May 2021.

## What is this product?

### Type

This product is a closed-ended investment company, incorporated as a public limited company in England and Wales. The Company has investment trust status. The Company's Shares are listed and traded on the London Stock Exchange.

### Objectives

The Company aims to generate a growing dividend income together with capital appreciation by investing in a global portfolio of financials stocks primarily issued by companies within the financial sector operating in the banking, insurance, property and other sub-sectors. The Manager may use financial derivatives (complex instruments based upon the value of underlying assets) to help achieve the Company's investment objective and to manage exposure to risk.

### Intended investor

Shares in the Company are offered to investors who are prepared to risk their capital up to the amount invested in the Company. Investors should be prepared to stay invested for the long term. Shares in the Company should be held as part of a diversified portfolio of investments.

### Conversion

The C Shares are expected to convert to New Ordinary Shares within 5 business days of the Calculation Date, being the business day immediately following the record date for the semi-annual dividend payable in respect of Ordinary Shares which is expected to be announced on or around 5 August 2021. On the Calculation Date for the C Shares, the net assets attributable to the Ordinary Shares then in issue, the net assets attributable to the C Shares issued pursuant to the Initial Issue (including, for the avoidance of doubt, any income accrued to such C Shares) and the resultant Conversion Ratio will be calculated. Holders of the C Shares will receive such number of New Ordinary Shares as results from applying the Conversion Ratio to their holdings in the C Shares on the Conversion Date, with fractions of C Shares being dealt with by the Directors in such manner as they see fit. Following the Calculation Date, the Directors shall procure that the Conversion Ratio and the number of New Ordinary Shares due to each holder of the C Shares is calculated and that fair valuations of the assets attributable to the Company's Ordinary Shares and the C Shares are prepared in accordance with the Company's latest published valuation methodology.

### Term

The C Shares are expected to convert into New Ordinary Shares in the capital of the Company within 3 months of the date of issue. The Company was initially launched with a fixed term life but in April 2020 moved to 5-yearly tender offers with no fixed end of life. The first of the regular tender offers will be on or before 30 June 2025.

## What are the risks and what could I get in return?

The summary risk indicator below is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

The risk indicator assumes you keep the product for five years. The actual risk can vary significantly if you sell your Shares at an early stage and you may get back less than you invested. You may not be able to sell your Shares easily or you may have to sell at a price that significantly impacts on how much you get back.

We have classified this product as 5 out of 7, which is “a medium-high” risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the ability for you to receive a positive return on your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product’s Annual Report available at [www.polarcapitalglobalfinancialtrust.co.uk](http://www.polarcapitalglobalfinancialtrust.co.uk)

The value of your investment can go down as well as up. This product does not provide any protection from future market conditions and regulatory changes, so you could lose some or all of your investment. If we are not able to pay you what is owed you could lose your entire investment.

## What are the risks and what could I get in return? (continued)

Assuming you invest £10,000, this table shows how your investment could perform and what you could get back over the next five years (the recommended holding period) under different scenarios. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past but are not exact indicators. What you get will depend on how the market performs and how long you keep the investment. The “stress scenario” shows what you might get back in extreme market circumstances, and it does not take into consideration the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, where applicable, but do not include any costs that you may pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The figures also assume that your C Shares are converted, within 3 months of issue, into New Ordinary Shares.

### Performance Scenarios

Investment £ 10,000

Scenarios		1 year	3 years	5 years (Recommended holding period)
<b>Stress</b>	What you might get back after costs	£1,984.91	£4,114.21	£3,049.04
	Average return each year	-80.15%	-25.62%	-21.14%
<b>Unfavourable</b>	What you might get back after costs	£7,949.53	£7,177.98	£6,912.60
	Average return each year	-20.50%	-10.46%	-7.12%
<b>Moderate</b>	What you might get back after costs	£10,546.19	£11,706.52	£12,994.52
	Average return each year	5.46%	5.39%	5.38%
<b>Favourable</b>	What you might get back after costs	£13,945.66	£19,030.18	£24,348.30
	Average return each year	39.46%	23.92%	19.48%

Performance figures have been produced in line with the regulation using relevant data from the past five years. Due to the long-term cyclical nature of the market the past five years may not be representative of the future and investors should consider all risk warnings before investing.

## What happens if the Company is unable to pay out?

As the shares are not traded directly with the Company or the Manager but are traded on the London Stock Exchange, any default by the Manager will not materially affect the value of your shares. However, a default by the Company or any of the underlying holdings could affect the value of your investment. As the shares are listed on the London Stock Exchange, any direct holding of these shares is not covered by any investor compensation schemes in relation to either the Manager or the Company.

The depository, HSBC Bank plc, is responsible for the safekeeping of your assets. You may face a financial loss if HSBC Bank plc defaults on its obligations. There is no compensation or guarantee scheme in place to offset all, or any of, this loss.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include any potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future. The figures also assume that your C Shares are converted, within 3 months of issue, into New Ordinary Shares.

### Table 1: Costs over time

The person selling you and/or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

## Costs over time

Investment Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
Total costs	£132.64	£436.30	£797.16
Impact on return (RIY) per year	1.33%	1.33%	1.33%

## What are the costs? (continued)

**Table 2: Composition of costs**

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and the meaning of the different costs categories.

This table shows the impact on return per year

<b>One-off costs</b>	Entry costs	0.00% <sup>1</sup>	The impact of the costs you pay when entering your investment. (This is the most you will pay, and you could pay less).
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
<b>Recurring costs</b>	Portfolio transaction costs	0.17%	The impact of the costs of us buying and selling underlying investments for the product.
	Other Ongoing costs	1.16%	The impact of the costs that we take each year for managing your investments <sup>2</sup> .
<b>Incidental costs</b>	Performance fees	0.00%	The Manager may be entitled to a performance fee, payable at the end of the Company's expected life. Such fee is calculated by pre-determined conditions, full information is provided in the Company's Strategic Report within the latest published Annual Report.
	Carried interests	0.00%	This product does not have any carried interests.

1. Investors acquiring the C Shares through the Initial Issue will incur a cost of 1.50%. No costs are expected to arise on conversion of C Shares to New Ordinary Shares.

2. This figure is based on estimated costs, often referencing historic data, and therefore actual costs paid may differ.

## How long should I hold it and can I take my money out early?

**Recommended holding period: 5 years<sup>3</sup>**

This product has no required minimum holding period and, as noted above, the C Shares are expected to convert into New Ordinary Shares within 3 months of the date of issue. The New Ordinary Shares are designed for long term investment. You can buy or sell your Shares or New Ordinary Shares arising on conversion on the secondary market on any day which the banks are normally open for business in the UK.

3. The 5 year period includes the period for holding the New Ordinary Shares, arising on conversion.

## How can I complain?

For complaints about the Company or the Key Information Document you can either write to Polar Capital, 16 Palace Street, London SW1E 5JD, email [investor-relations@polarcapital.co.uk](mailto:investor-relations@polarcapital.co.uk), or call 020 7227 2700.

You do not have the right to complain to the Financial Ombudsman Service about the management of the Company.

## Other relevant information

The cost, performance and risk calculations included in this Key Information Document follow the methodology prescribed by EU rules. The data used in these calculations and the specific methodology applied may change in the future. Depending on how you buy your Shares, you may incur other costs including broker commission, platform fees and stamp duty.

You can find the latest Annual Report, Half Year Report and other information about the Company on the website [www.polarcapitalglobalfinancialtrust.co.uk](http://www.polarcapitalglobalfinancialtrust.co.uk).
