What is this product?

Type

This is an investment trust.

Investment objective and policy

The Fund aims to provide an income of 3-5% per annum by investing in a diversified range of assets and markets worldwide which meet the Investment Manager's sustainability criteria. This is not guaranteed and could change depending on market conditions.

The strategy is to invest principally in the investment universe associated with the benchmark index, but with anelement of leeway in investment remit to allow for a conviction-driven approach and an emphasis on specificcompanies and targeted themes. The Company may also invest in other collective investment vehicles wheredesirable, for example to provide exposure to specialist areas within the universe. The Company may hold up to 20% of its portfolio in equities and collective investment vehicles outside the benchmark index.

The Manager has adopted a unique and consistent investment process, taking a stock specific approach with an emphasis on dynamic growth companies. Sector weightings play a secondary role, resulting naturally from stock selection. Fundamental research and engagement with investee companies forms the basis of each investment decision taken by the Manager.

The Company will predominantly invest in companies from the FTSE 250 Index, but may hold up to 20% of its portfolio in equities and collective investment vehicles outside the benchmark index.

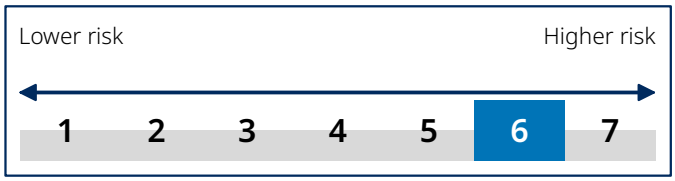

The Company has the ability to use gearing for investment purposes up to 25% of total assets.

Intended retail investor

The Company is intended for retail and institutional investors.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of market movements. The risk indicator assumes that you keep the product for 5 years. The risk is considered to be higher if the holding period is shorter.

The risk category was calculated using historical performance data and may not be a reliable indicator of the Company's future risk profile.

We have classified this product as 6 out of 7, which is the second-highest risk class.

The Company is in this category because it can take risks in search of higher rewards. This category rates the potential losses from future performance at a "medium" level, and poor market conditions will likely cause shareholders to lose money.

The following factors serve to increase risk and may lead to higher volatility in the Company's share price: it invests solely in the securities of one country; it invests in a relatively concentrated portfolio; it invests in smaller companies which may be less liquid than larger companies; it may use derivatives for specific investment purposes; and it may borrow (or "gear") to purchase assets.

Credit risk

The Company has no significant exposure to credit risk. None of the Company's investments represent more than 10% of its net asset value.

This table shows the money you could get back over the next five years, under different scenarios, assuming that you invest GBP 10,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Schroder UK Mid Cap Fund plc is unable to pay out?

You may sell your shares at any time on the London Stock Exchange using your broker. Your shares are sold to another buyer in the market without recourse to the Company. If the Company goes into liquidation the investments will be sold and you will receive your pro rata share of the proceeds after settlement of any liabilities. You would not be entitled to compensation from the Financial Services Compensation Scheme.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods and are based on an investment of GBP 10,000.00. The figures are estimates and may change in the future.
