

Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product: **SEQUOIA ECONOMIC INFRASTRUCTURE INCOME FUND LIMITED - ORDINARY SHARES**

ISIN: **GG00BV54HY67**

PRIIP Manufacturer: **Sequoia Economic Infrastructure Income Fund Limited**

Website: www.seqifund.com Call: **+44 (0) 1481 737600** for more information.

This key information document was produced: **24/10/2018**

What is this product?

Type: The product is a non-cellular company limited by shares with an unlimited life, incorporated under the Companies (Guernsey) Law, 2008, as amended (the “**Guernsey Companies Law**”) on 30 December 2014 and is listed on the London Stock Exchange Main Market. As such, there is no maturity date. Shares of the PRIIP are bought and sold via markets. Typically, at any given time on any given day, the price at which an ordinary share can be bought will be higher than the price at which an ordinary share can be sold, brokers may additionally charge commissions. The product has borrowed to purchase assets for the company. This will magnify any gains or losses made by the company.

Objectives: The product’s investment objectives is to provide investors with regular, sustained, long-term distributions and capital appreciation from a diversified portfolio of senior and subordinated economic infrastructure debt investments.

Intended retail investor: Typical investors in the product are expected to be institutional, sophisticated investors, private clients through their wealth managers, experienced investors, high net worth investors, professionally advised investors and knowledgeable unadvised retail investors who have taken appropriate steps to ensure that they understand the risks involved in investing in the Company.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class.

The Risk Indicator rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact your ability to realise your position.

This product does not include any protection from future market performance, so risk can vary significantly due to potential short term market availability. As a result, realisations in such market conditions will significantly impact on how much you get back.

Currency Risk: Movements between the currency of underlying assets and the currency in which the product prices may impact the final return you will get. This risk is not considered in the indicator shown above.

Credit Risk: As the majority of the product’s underlying bond and loan investments have credit ratings lower than investment grade; the portfolio is exposed to the risk that a deteriorating credit environment may lead to asset default, adversely impact the value of the products investments, credit income derived from the investments or the ability to sell them. As a result the fund may be adversely effected and may not achieve sufficient income to enable it to pay investors the intended dividends.

Liquidity Risk: As shares trade via the secondary market, trading volumes may reduce, or shares may trade at a discount to their respective Net Asset Value, due to a variety of factors, such as market conditions, liquidity concerns or company performance. As a result Shareholders may be unable to realise their investment at quoted market prices.

Interest Rate Risk: The value of the product’s underlying fixed coupon holdings may be adversely impacted by rising interest rates. Conversely, these holdings will benefit from falls in interest rates. If interest rates differ from expectations the net income of the PRIIP may be adversely affected.

Leverage or Borrowing Risk: Product leverage is relatively short-term, whereas the Investments of the product are medium to long-term. To the extent that refinancing facilities are not available at economic rates or at all, the product may be required to sell assets at disadvantageous prices, impacting the products value.

Market Risk: Should market conditions change, if there is deterioration in the intended investment pipeline and liquidity is unable to be deployed into suitable opportunities, investors may experience “cash drag”, which may impact the products ongoing dividend target and investment objective.

Performance Scenarios				
Investment £10,000				
		1 year	2 years	3 years (Recommended holding period)
Stress scenario	What you might get back after costs	£6,707	£7,164	£6,610
	Average return each year	-32.93%	-15.36%	-12.89%
Unfavourable scenario	What you might get back after costs	£9,349	£9,452	£9,682
	Average return each year	-6.51%	-2.78%	-1.07%
Moderate scenario	What you might get back after costs	£10,687	£11,423	£12,213
	Average return each year	6.87%	6.88%	6.89%
Favourable scenario	What you might get back after costs	£12,225	£13,815	£15,417
	Average return each year	22.25%	17.54%	15.52%

The table shows the money you could get back over the next 3 years under different scenarios, assuming that you invest £10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you may get will vary depending on how the market performs and how long you keep the investment.

Furthermore, this information is compiled according to prescribed formulae which take into account, amongst other things, past performance. In the opinion of the product manufacturer, and based on the current portfolio construction, the product is unlikely and not designed to achieve consistent performance in line with the favourable scenario presented.

The figures shown include all the costs of the product itself and do not include any costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the amount you get back.

What happens if Sequoia Economic Infrastructure Fund Limited is unable to pay out?

The value of the shares in the PRIIP is directly impacted by the solvency status of Sequoia Economic Infrastructure Income Fund. No service provider to the product has any obligation to make any payment to you in respect of the Ordinary Shares. There are no investor compensation or guarantee scheme available to investors should the product be unable to pay out, you should be prepared to assume the risk that you could lose all of your investment.

What are the costs?

Costs over time	The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs (where applicable).			
	The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume that you invest GBP 10,000. The figures are estimates and may change in the future.			
	The person selling to you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment overtime.			
	Investment £10,000	If you cash in after 1 year	If you cash in after 2 years	If you cash in at the end of recommended holding period of 3 years
Total Costs	£119	£244	£377	
Impact on return (RIY) per year	1.11%	1.11%	1.11%	

Composition of Costs	<p>The table below shows:</p> <ul style="list-style-type: none"> The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period. What the different cost categories mean.
