What is this product?

Type	The Company is a closed-ended investment company within the meaning of Section 833 of the Companies Act 2006 whose shares are listed on the London Stock Exchange. It is an alternative investment fund under the Alternative Investment Fund Managers Directive. The Company's ordinary shares are therefore available to the general public.
Objectives	The Company's objective is to provide capital appreciation through investment in a portfolio of smaller companies principally based in countries bordering the North Atlantic Ocean. The Company will pursue its investment objective by investing in both listed and unquoted companies. The Company also owns and controls an investment dealing and holding company, Consolidated Venture Finance Limited.
Intended retail investor	The intended investor in the Company is a retail investor who is seeking long term (at least 5 years) real growth in capital value from investing in a portfolio of companies, predominantly based in countries bordering the North Atlantic Ocean. An investment in the shares of the company is only suitable for investors who are capable of evaluating the potential benefits of investment and have sufficient resources to bear any loss suffered by the investment.
Gearing	The Company has the ability to borrow in the form of long term loan facilities, however has no borrowing at present. Gearing is limited to a maximum of 30% of net assets. Any future borrowing would magnify any gains or losses made by the Company.
Bid / Offer spread	Shares of the Company are bought and sold via markets. Typically, at any given time on any given day, the price you pay for a share will be higher than the price at which you could sell it.
Life of the product	The Company does not have a fixed life. The Manager cannot unilaterally terminate this product and there are no circumstances under which it can be automatically terminated.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years. If you sell your product earlier you may have to sell at a price that significantly impacts how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market

conditions could impact the capacity of the Company to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs that you pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

How long should I hold it and can I take money out early?

Recommended required minimum holding period: 5 years

The product has no required minimum holding period but is designed for medium to long-term investment. The recommended minimum holding period of 5 years has been selected as the Company's ordinary shares are designed to be held over the long term and may not be suitable as short-term investments.

There is no guarantee that any appreciation in the value of the Company's investments will occur and investors may not get back the full value of their investments. The value of the ordinary shares and the income derived from them (if any) may go down as well as up. Although the ordinary shares are traded on the Main Market, it is possible that there may not be a liquid market in the shares and investors may have difficulty selling them. Accordingly, investors may be unable to realise their shares at the quoted market price (or at the prevailing net asset value per share), or at all.

There are no additional fees or penalties incurred on exit however the price you receive on the open market may not reflect the underlying NAV of the shares.
