

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

Artemis UK Select Fund (the "fund")

Class I accumulation units, GBP [ISIN: GB00B2PLJG05]

The fund is managed by Artemis Fund Managers Limited.

Objectives and investment policy

Objective: The fund aims to achieve long-term capital growth.

Policy:

- The fund will principally invest (a minimum of 80%) in the shares of companies listed, quoted or traded in the UK.
- The fund may also invest in the shares of companies listed, quoted and/or traded in the UK but domiciled elsewhere.
- The fund's reference benchmark is the FTSE All-Share Index but the fund is actively managed and is not restricted in respect of choice of investments either by company size or industry. The fund will not hold an investment simply because it represents a significant proportion of its benchmark.
- The fund may seek to profit from short positions in assets (short exposure is where the fund tries to profit from a fall in the price of an asset).
- The fund may invest in fixed interest securities which are investments (which could be issued by a company, a government or another entity) that pay a fixed level of income or interest.
- The fund may invest in derivatives (financial instruments whose value is linked to the expected price movements of an underlying asset) to protect the value of the fund, reduce costs and/or generate additional income.

Other information:

- Investment in the fund should be regarded as a medium to long-term investment.
- Class I units are only available to investors at Artemis Fund Managers Limited's discretion.
- You can buy and sell units Monday to Friday, except on UK public holidays, each week.
- Transactions are processed at 12 noon UK time and we will include your instruction to buy or sell units if it is received before that point.
- Any income this fund receives is reinvested into the fund and automatically reflected in the value of units.

For further explanation of some of the terms used above, please visit our website artemisfunds.com/glossary to view a glossary of terms.

Risk and reward profile

- The fund is in the risk category shown due to its historic volatility (how much and how quickly the value of units in the fund have risen and fallen in the past). It may not be a reliable indication of the future risk profile of the fund.
- The risk category shown is not guaranteed and may change over time.
- A risk indicator of "1" does not mean that the investment is "risk free".

The risk indicator may not fully take into account the following risks:

- The price of units, and the income from them, can fall and rise because of stockmarket and currency movements.
- Stockmarket prices, currencies and interest rates can move irrationally and can be affected unpredictably by diverse factors, including political and economic events.
- A portion of the fund's assets may be invested in a currency other than the fund's accounting currency (sterling). The value of these assets, and the income from them, may decrease if the currency falls in relation to sterling, in which the fund is valued and priced.

- The fund may have a concentrated portfolio of investments, which can give rise to more risk than where investments are spread over a large number of companies. This may increase the potential gains, however, the concentration of exposure and lack of diversification may also substantially increase the risk of loss by this fund.
- The fund may have concentrated exposures to those industries or sectors whose prospects the Investment Manager deems attractive. This may increase the potential gains but also increases the risk of suffering a loss.
- The fund may hold derivatives with the aim of profiting from falling prices. If the related assets rise in value the fund will lose money.
- Investing in small and medium-sized companies can involve more risk than investing in larger, more established companies. Shares in smaller companies are often not as easy to sell as shares in larger companies are. This can cause difficulty in buying, valuing and selling those shares. Also, reliable information for deciding their value or the risks may not be available.
- Investments in fixed interest securities are subject to market and credit risk and will be impacted by movements in interest rates. Interest rate movements are determined by a number of economic factors, in particular market expectations of future inflation.

Charges for the fund

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charge	0.82%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- The ongoing charges figure is based on the expenses for the year ending December 2017. This may vary from year to year.
- The ongoing charges figure includes any entry/exit charge paid by the fund when buying or selling shares or units in another fund.
- The annual management charge is taken from income.

Other costs

- There are two prices for this unit class each day – a higher price you pay to buy units (the 'offer' price) and a lower price you receive when you sell units (the 'bid' price). The difference between the prices is called the 'spread'.
- The spread is separate to the entry, exit and ongoing charges shown in the table.
- The spread reflects the difference between the buying and selling prices of the investments in the fund's underlying portfolio and the costs associated with buying and selling those investments (for example, brokers' commission and transaction taxes).

For more information about charges and costs, please see section 15 of the fund's prospectus, or visit our website at artemisfunds.com.

Past performance

- Past performance in the chart shown includes all charges except entry charges for the period when these were applicable.
- How the fund has performed in the past is not a guide to how it will perform in the future.
- Performance is calculated in sterling.
- This fund was launched on 3 April 1998.
- This class was launched on 1 September 2010.
