

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Acumen Bond Portfolio X

A Sub-fund of the Acumen OEIC (ISIN Accumulation: GB00BZ3T3D26)
This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The Fund seeks to deliver long term capital growth by investing in a range of global financial markets.

The Fund aims to have a minimum fixed income exposure of 80%. The Fund may also have exposure to a range of global asset classes including equities, commodities, property, cash, near cash, deposits, transferable securities and money market instruments. Exposure to asset classes other than fixed income investments will be dependent on the strategic view of the Investment Manager.

The Fund primarily gains exposure to the above asset classes by investing in a range of low cost, index tracking Funds or exchange traded Funds. The Fund may also gain exposure to the above asset classes through investment in collective investment schemes,

investment trusts, investment companies and where permissible by holding the asset classes directly.

The Fund is managed in accordance with the guidelines outlined in the Investment Association's "Global Bonds" Sector.

The Fund is permitted to use derivatives for both efficient portfolio management (including hedging) as well as for investment purposes in order to achieve the investment objective of the Fund.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund has significant exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is

generally greater for longer term bonds and for bonds with higher credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.
- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 31/10/2018. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 24 - 26 of the Fund's Prospectus, which is available at www.ifslfunds.com.
