Aegon UK Equity Absolute Return Fund

a sub-fund of Aegon Asset Management UK ICVC

Sterling Class B - Accumulation shares (ISIN: GB00B4XS8040)

This fund is managed by Aegon Asset Management UK plc (the authorised corporate director ("ACD")).

Objectives and investment policy

Objective: to achieve a positive absolute return over any 36 month period in all market conditions. By investing in the Fund, capital is at risk. There is no guarantee that the Fund will deliver positive returns over this, or any, time period.

Policy: The Fund invests in derivatives, such as contracts for difference, to gain exposure to equities of companies which are listed, quoted or traded in UK markets or which have their headquarters or a significant part of their activities in the UK but which may also be quoted on a regulated market outside of the UK.

As a consequence of the Fund's extensive use of derivative contracts and the related requirement for the Fund to hold sufficient levels of highly liquid collateral, **a substantial proportion of the Scheme Property of the Fund will consist of cash, near cash and deposits.**

The Fund can also invest directly in equities and equity indices.

At least 90% of the Fund will be invested in, or exposed to, UK companies and/or UK equity indices.

The Fund may invest in, or gain derivative exposure to, companies of any market capitalization (small, medium or large) and in any industry sector.

The Fund aims to achieve limited correlation with broad UK equity markets and looks to achieve lower volatility than UK equity markets (i.e. lower changes in value).

The Fund is actively managed and at any one time, the scope of investment may be themed by industry, size or style to take advantage of opportunities identified.

To the extent that the Fund is not fully invested in the main asset classes listed above, the Fund may also invest in other transferable securities, collective

investment schemes (up to 10% of Net Asset Value and which may include schemes managed by the ACD or its affiliates), money market instruments, deposits and cash and near cash. It is intended that investment in any other collective investment schemes will be predominately in approved money market instruments.

Derivatives can be used for investment purposes, for example exposure to assets may be gained through the use of derivatives (including long and short positions for the purposes of adjusting risk exposures). Derivatives may also be used for efficient portfolio management (including hedging to reduce currency risk).

Non-Sterling exposure may or may not be hedged back to Sterling to reduce currency risk.

Other information

You can buy, sell or exchange the Fund's shares on any business day (see 'Dealing Day' in the Prospectus Definitions for more information).

Income the Fund receives will be reinvested and automatically reflected in the value of your shares.

The Fund is not managed in reference to any index or benchmark

It is expected that the Fund will be held as part of a diversified portfolio which may include other assets such as bonds, equities, property and cash.

Risk and reward profile

1	2	3	4	5	6	7
Lower risk / potentially lower rewards			Higher risk / potentially higher rewards			

The risk/reward profile shows the risk of investing in the Fund, based on the rate at which its value has changed in the past. This Fund has the above risk/reward rating because of its investment strategy: the value of 'absolute return' funds may not change in line with share or bond prices.

The Fund's category is not guaranteed and may change over time. It is calculated using historical data, which may not be a reliable indication for the future. Category 1 does not mean 'risk free'. Positive returns are not guaranteed and no form of capital protection applies.

The following risks which are not, or are not fully, reflected in the risk/reward profile are also relevant to the Fund:

Counterparty: Investments such as derivatives are made using financial contracts with third parties. Those third parties may fail to meet their obligations to the Fund due to events beyond our control. The Fund's value could fall because of: (i) loss of monies owed by the counterparty; and/or (ii) the cost of replacement financial contracts.

Derivatives: The value of derivatives depends on the performance of an underlying asset. Small changes in the price of that asset can cause larger changes in the value of the derivative. This increases potential gain but also potential loss.

Full details of risks are disclosed in the section 'Risk Factors' in the Prospectus.
