

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Rathbone High Quality Bond Fund (I Acc)

Authorised Corporate Director: Rathbones Asset Management Limited  
I Acc ISIN GBOBD5DN500

Objectives and investment policy

The objective of the fund is to preserve capital and pay an income by delivering a greater total return than the Bank of England's Base Rate + 0.5%, after fees, over any rolling three year period. There is no guarantee that this investment objective will be achieved over three years, or any other time period. We use the Bank of England's Base Rate + 0.5% as a target for our fund's return because we aim to provide a return in excess of what you would receive in a UK savings account. This is an investment product, not a cash savings account. Your capital is at risk. We also use the iBoxx £ Non-Gilt excluding BBB 1-5 years index as a comparator benchmark against which you can compare the fund's performance. To meet the objective, the fund manager will invest at least 80% of the fund in government and corporate bonds with high credit ratings (AAA to A-). The remaining 20% of the fund is invested in investment grade government and corporate bonds with lower credit ratings (BBB+ to BBB-) or bonds with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. If a bond's rating falls below BBB-,

otherwise known as high yield, the fund manager will sell it within six months. The fund may invest globally but at least 80% of the portfolio will be invested in sterling denominated assets or hedged back to sterling. Derivatives may be used by the fund for the purposes of efficient portfolio management and hedging. Our fund is designed for investors with a basic knowledge of bonds who seek to protect their capital and receive income. You should intend to invest for longer than three years, understand the risks of our fund and have the ability to bear a capital loss. For definitions please visit the glossary on our website. You can buy and sell units on each business day of the fund between 9am and 5pm. Any income arising in relation to this unit class will be accumulated (i.e. automatically reinvested and reflected in the price of the shares). We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time. The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. However, the lowest category (1) does not mean a risk free investment. During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks: **Credit risk:** Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest

payment. This is known as a 'default' and will result in a loss. **Interest Rate Risk:** Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable. **Counterparty risk:** A company that we deal with may renege on its obligations, costing you money. **Liquidity risk:** Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money. **Management risk:** People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money. **Operational risk:** We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money. **Currency risk:** We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same. The risk indicator for this fund reflects the following: - The emphasis on income helps the the manager maintain a moderate risk profile for the fund.

Charges

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing Charges	0.40%
Charges taken from the Sub-Fund under certain specific conditions.	
Performance Fee	None

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing RAM@Rathbones.com.

The charges you pay are used to pay for the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment. The fund manager receives an annual fee, which is included in the ongoing charges shown. Ongoing charges are the same for all investors in the same class. The charges shown are based on actual fees and expenses. The ongoing charges figure excludes portfolio transaction costs.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

Past performance

The performance of this Class is calculated in GBP

This share class launched on 23 July 2019.

The Fund launched on 16 November 2018.

Past performance should not be seen as an indication of future performance. Basis of performance: Price performance based upon mid to mid price. Past performance is reported on a full calendar year basis.
