# **Key Investor Information**

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# **SJP Greater European Progressive**

(ISIN: Class L accumulation units GB0001013456). This fund is managed by St. James's Place Unit Trust Group Ltd.

### Objectives and investment policy

The fund aims to maximise returns through capital growth and income by investing at least 80% in shares in UK and other European companies. It may also invest in other geographic areas.

The fund is also permitted to invest in other types of transferable securities, units and/or shares in collective investment schemes, money market instruments and deposits. The fund is permitted to invest in derivatives and forward transactions for the purposes of efficient portfolio management (including hedging).

The fund is actively managed without reference to a benchmark. The strategy uses a blend of investment styles which, through bottom up fundamental analysis, seek to identify investment opportunities in small, medium and large companies.

You can choose to invest in accumulation units, which reinvest any income produced by the fund's investments, or income units which pay the income to the investor annually in November.

The fund is normally priced every working day and you can take your money out whenever you wish to do so.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Other information: The fund's custodians hold assets on behalf of the fund but separate from their own balance sheets. This is designed to protect the assets if the custodian's default on their obligations. For further details on the specific risks applicable to this fund please see the fund's prospectus.

## Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The category above reflects how much the fund's unit price has moved up and down over the last five years. The fund invests in equities, whose value can change substantially over short periods of time. Even funds in the lowest risk category are not risk-free. The value of your investments is not guaranteed and you may not get back the amount invested.

Other key risks to understand for this fund are:

- Foreign currency exposure. The fund holds assets denominated in other currencies, the value of which may rise and fall due to movements in exchange rates.
- Emerging markets. This fund invests in less developed economies and less mature markets, so its value may fluctuate more than that of a fund which invests in developed economies.
- Derivative risk. This fund may invest in derivatives for efficient portfolio management. This is intended to reduce risk, reduce costs, or to generate additional capital or income at a low level of risk.
- Liquidity risk. In certain market conditions the fund's investments may be illiquid, meaning at times they may be difficult to buy and sell. This may cause an adverse impact on the trading price and can decrease the value of the fund.
