Objective and Investment Policy

Objective:	The Fund seeks to achieve long-term capital appreciation.
Investment policy:	The Fund seeks to achieve its investment objective by investing, directly or indirectly, primarily (i.e., at least 65% of its net assets) in equities of companies located in or with substantial ties to the Asia ex Japan region. On an ancillary basis, the Fund may invest in other permitted assets on a worldwide basis. For the purpose of this policy, the Asia ex Japan region consists of all countries and markets in Asia excluding Japan, but including all other developed, emerging and frontier countries and markets in Asia.
Dividend policy:	Income generated by any of the investments is planned to be fully reinvested (that is, the Fund does not plan to make any dividend or interest payments).
Holding period:	The Fund has no minimum holding period, however, the Fund has a long-term investment horizon (typically 5 years or longer). This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
Share transactions:	An investor can buy and sell shares of the Fund on any Business Day in Luxembourg.

Risk and Reward Profile

Interpretation of the Risk and Reward Indicator:	The Risk and Reward Indicator takes into account historical data which is not a reliable indicator of the future. The risk category was calculated using related historical performance data and it may not be a reliable indicator of the Fund's future risk profile. The risk category of the Fund is neither a target nor guaranteed to remain stable over time. A risk category of 1 does not mean a risk free investment.
Why is this Fund in this category?	The Fund is in risk category 5 because it invests primarily in Asian equity securities. Many Asian markets are considered to be emerging markets and may experience higher than average changes in valuation ("volatility"). Higher changes in valuation are expected to result in higher changes in the Fund's net asset value.
Are there other particular risks you should consider?	The Risk and Reward Indicator does not provide an overall risk profile of the Fund, nor does it fully capture all the risks of investing in the Fund. Risks that you should consider include: market risk, interest rate risk, foreign exchange risk, settlement risk, valuation risk, credit risk, counterparty risk, liquidity risk, compliance risk, custody risk, operational risk, political risk and legal risk. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk. For more details about risk, please refer to the Fund's Prospectus under "Risk Considerations," which is available at global.matthewsasiasia.com/prospectus .
