

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco Global Targeted Returns Fund (UK) (the "Fund")

### A fund of Invesco Diversified Returns Investment Series ICVC (the "Company") Accumulation share class (ISIN: GB00B8CHCY21) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

## Objectives and Investment Policy

- The Fund aims to achieve a positive total return in all market conditions over a rolling 3 year period.
- The Fund targets a gross return of 5% p.a. above 3 month SONIA (the Target Benchmark) and aims to achieve this with less than half the volatility (a measure of the size of short term changes in the value of an investment) of global equities as measured by the MSCI World Index GBP Hedged Net Total Return (the Constraining Benchmark), over the same rolling 3 year period. There is no guarantee that the Fund will achieve a positive return or its target and an investor may not get back the full amount invested.
- The Fund is actively managed and seeks to combine a wide range of investment ideas in a diversified portfolio. The Fund uses a range of investment strategies and techniques to invest in a broad selection of asset classes across all economic sectors worldwide.
- These asset classes include shares of companies, debt securities (both corporate and government), cash, warrants, collective investment schemes (including exchange traded funds and funds managed by Invesco) and money market instruments. The Fund may gain exposure to commodities through the use of derivatives and other instruments such as exchange traded commodities.
- The strategies make significant use of derivatives (complex instruments) for investment purposes and to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income.
- The reference to (UK) in the Fund name only relates to the Fund's domicile and is unrelated to the Fund's objectives and Investment policy.
- You can buy, sell and switch shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

## Risk and Reward Profile

Lower Risk ← Higher Risk  
Typically lower rewards      Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

## Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The Fund makes significant use of financial derivatives (complex instruments) which will result in the Fund being leveraged and may result in large fluctuations in the value of the Fund. Leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.
- The Fund may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. This counterparty risk is reduced by the Manager, through the use of collateral management.
- Although the Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.
- The Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.
- The Fund's performance may be adversely affected by variations in interest rates.
- A more detailed description of risk factors that apply to this Fund is set out in Section 17 of the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Any charges shown above are the maximum that might be taken out of your money before it is invested.	
Charges taken from the Share Class over a year	
Ongoing charge	1.52%
Charges taken from the Share Class under certain specific conditions	
Performance fee	None

- The ongoing charge figure reflects the fund management fee, a fixed fee. The figure excludes indirect ongoing costs and portfolio transaction costs.
- For a full breakdown of the fund's charges please see the Costs and Charges document on our website: [www.invesco.com/uk/icvc-charges](http://www.invesco.com/uk/icvc-charges)
- In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

## Past Performance

- Fund launch date: 09 September 2013.
- Share Class launch date: 09 September 2013.
- The base currency of the Fund is Sterling.
- Performance figures are calculated in Sterling.
- Performance figures are calculated inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs.
- Past performance is not a guide to future returns.
- Target Benchmark: The Fund targets a gross return of 5% per annum above 3 month SONIA (ICE 3 month Term Sterling Overnight Index Average Reference Rate) over a rolling 3 year period. The Fund's performance can be measured against the Target Benchmark as a means to assess if the Fund's target has been achieved. There should not be an expectation that this target will be exceeded.

— Prior to 1 January 2022, the Fund's Target Benchmark was 5% above UK 3 month LIBOR. The Benchmark figures shown up until 31 December 2021 are therefore for previous Target Benchmark.
