LEGG MASON
GLOBAL ASSET MANAGEMENT

Legg Mason IF Martin Currie Asia Pacific Fund

Class A Accumulation

ISIN: GB00BVZ6TS00

A sub-fund of: Legg Mason Funds ICVC (the "Company")

Managed by: Legg Mason Investment Funds Limited, part of the Legg Mason group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of the fund's value in the long term through investment in the Asia Pacific region (excluding Japan) and seek to outperform the MSCI AC Asia Pacific ex Japan (Net Dividends) Index over rolling 3 year periods (net of fees).

Investment Policy

- The fund will invest at least 80% in shares of companies based in or conducting most of their activities in Asia Pacific countries, excluding Japan.
- The fund will usually invest in a concentrated portfolio, typically 40 to 60 companies.
- The fund may invest up to 10% of its assets in other investment funds, which may include funds associated with the manager.
- The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective or to generate additional growth (investment purposes) as well as to reduce risk or cost for the fund (efficient portfolio management).

Benchmark: The MSCI AC Asia Pacific ex Japan (Net Dividends) Index has been chosen as a target benchmark for the fund as it is a group of securities that most accurately represents the geographic region to which the fund is seeking exposure.

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. While most of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The fund will also invest in securities that are not included in the benchmark. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmark

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

Lower risk Potentially lower reward — **Higher risk** Potentially higher reward

1	2	3	4	5	**6**	7

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of companies from various Asian countries and sectors has historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in Asia, which means that it is more sensitive to local economic, market, political or regulatory events in Asia, and will be more affected by these events than other funds that invest in a broader range of regions.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.35%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

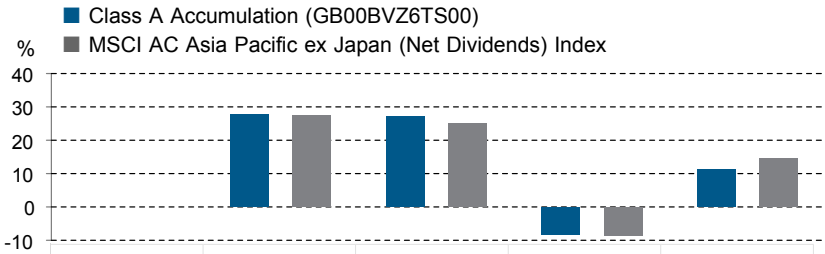

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

If you switch funds within the Company, you may be charged a maximum 1.00% entry charge on your new fund.

The ongoing charge is based on expenses for the 12 month period ending December 2019. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.
