

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

New Capital Dynamic European Equity Fund (the "Fund") A sub-fund of New Capital UCITS Fund Plc (the "Company")

New Capital Dynamic European Equity Fund - EUR I Acc (the "Share Class") – ISIN: IE00BWSW4Z44
The management company of the Fund is Waystone Management Company (IE) Limited (the "Manager")
This key investor information document is accurate as at 31-01-2024

Objectives and Investment Policy

Objective: The Fund aims to achieve capital appreciation through investment in securities in the European Region, including the United Kingdom and Switzerland.

Policy: The Fund will primarily invest in equities and equity-related securities of companies that primarily have their registered office in the European Region including the UK and Switzerland and which are listed or traded on Recognised Markets worldwide. Equity-related securities include convertible bonds issued by corporates with fixed and/or floating rates of interest and with investment grade ratings of Baa3 or above by Moody's or BBB- or above by Standard and Poor's or equivalent credit ratings.

The Investment Manager seeks to invest in companies that score most attractively according to a proprietary quantitative equity screen based on fundamental analysis. Subjective analysis of these stocks is also applied before investment as a risk and quality control measure. The Fund may use techniques and instruments for purposes of efficient portfolio management including reduction of risk or cost, or the generation of additional capital or income for the Fund, with a level of risk which is consistent with the risk profile of the Fund such as forward foreign currency exchange contracts, futures contracts, options, put and call options on securities, indices and currencies, and swap contracts. The use of these instruments may result in the Fund being leveraged. However, the total exposure of the Fund as a result of all positions held by it will not exceed its Net Asset Value.

The Investment Manager has discretion in managing the investments of the Fund. Dividends on income share classes will be paid bi-annually. Accumulating share classes will accumulate all income and gains.

Benchmark: The Fund's benchmark is the MSCI Europe Net Return EUR Index and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The sub-investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors seeking capital growth and income over a medium term with a high level of volatility.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The Fund is in category 6 as it has a high level of volatility. The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future risk profile of the Fund. The lowest risk category does not mean a "risk-free investment". The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk, forward contracts do not precisely mirror movements in the market exchange rate which can result in differences in performance between share classes.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.

Costs

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
