Veritas Third Eye Global Emerging Markets Fund (the Fund) – Class A Acc GBP

The Fund is a sub-fund of Veritas Funds PLC
Management Company: KBA Consulting Management Limited

ISIN: IE00BJV3KN35

Objectives and Investment Policy

The Fund is an emerging markets proposition for investors who wish to build capital over a period of 5-10 years.

The Fund will invest in equities of a relatively select group of superior companies (as determined by the Investment Manager through its stock selection process) which are either listed and/or domiciled in emerging markets or have a meaningful economic exposure to emerging markets. The Investment Manager may consider whether a company has a meaningful exposure to an emerging market based on several factors which may include its business strategy, particular assets in such markets, the degree to which the company relies on emerging markets for its future growth and/or the contribution of revenues/earnings from such markets.

The Fund is actively managed and is not managed in reference to, or constrained by, any benchmark.

Please refer to the "Investment Policy" section of the Fund's prospectus for more details around the investment philosophy of the Fund and some of the selection criteria for investments.

Investments in the Fund may include financial derivative instruments. Such instruments may be used to obtain, increase or reduce exposure to underlying assets and may create leverage; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund. The Investment Manager will ensure that the use of derivatives does not materially alter the risk profile of the Fund.

You can buy, sell and switch shares of the Fund on demand on any Business Day as defined in the "Definitions" section of the Fund's Prospectus.

The base currency of the Fund is USD.

This share class does not intend to pay dividends. Any income which may result from the Fund's investments, will be reinvested into the Fund.

Risk and Reward Profile

The Risk and Reward Indicator table shows where this share class ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money. It is based upon studies of how such investments have performed in the past and you should note that this share class may well perform differently in the future. The shaded area in the table above shows the share class's ranking on the Risk and Reward Indicator. The lowest category does not mean that a share class is risk free. The table uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

Historical data may not be a reliable indication for the future. The rating is not guaranteed to remain the same and the risk/reward category may change over time.

This share class is in a higher risk category because it invests primarily in shares. Shares may offer high long-term growth potential, but the prices of shares fluctuate and often go down as well as up. The Fund invests in Emerging Market equities which have historically experienced more price volatility than developed markets. In addition, the Fund has a currency risk given that it invests in shares which are priced in different currencies.

The Fund may also be exposed to counterparty risk which could lead to financial loss if a counterparty is unable to meet its contractual obligations. The Fund is also exposed to liquidity risk where there could be insufficient buyers or sellers to trade the underlying holdings.

Recommendation: The Fund is suitable for investors with a long-term time horizon – typically five years.

A more detailed description of risk factors that apply to this Fund is set out in the "Risk Warnings" section of the Supplement.

Charges for this fund

One off charges taken before or after you invest

| | |
