JOHCM Emerging Markets Fund

B GBP IE00B4W7Q644

A sub-fund of J O Hambro Capital Management Umbrella Fund plc
Managed by JOHCM Funds (Ireland) Limited

Objectives and investment policy

- The primary investment objective of the Fund is to seek long-term capital growth.
- The Fund aims to achieve its objective by investing in a portfolio of equity securities of companies domiciled or exercising the predominant part of their economic activities in Emerging Markets around the world. At no time will less than two-thirds of the Fund's total assets be invested in such securities.
- Performance of the Fund may be measured against the MSCI Emerging Markets NR (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund manager. Therefore the shareholdings of the Fund may differ significantly from those of the Index. The Index is used as it captures large and mid cap representation across 26 Emerging Markets (EM) countries*. With 1,194 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.
- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- Any income the Fund generates for this share class will be reinvested annually to grow the value of your investment unless the shareholder elects for a cash dividend.
- You can buy and sell shares in the Fund, before 5.30pm, on any day which is a working day in Dublin.
- The MSCI data is comprised of a custom index calculated by MSCI for, and as requested by, J O Hambro Capital Management Limited. The data is for internal use only and may not be reproduced or used in connection with creating or offering any securities, financial products or indices. Neither MSCI nor any other third party involved in or related to compiling, computing or creating the MSCI data (collectively, the "MSCI Parties") makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and the MSCI Parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to such data. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Risk and reward profile

Lower risk				Higher risk		
Typically lower rewards				Typically higher rewards		
1	2	3	4	5	6	7

- The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on historical data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.
- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and /or regulatory Risks
- Emerging markets risk: Investing in companies in emerging markets involves higher risk than investing in established economies or securities markets. Emerging Markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets. Investments in emerging markets funds should not constitute a substantial portion of an investor's portfolio.
- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.	
Charges taken from the fund over a year	
Ongoing charge	2.00%
Charges taken from the fund under certain conditions	
Performance fee	
During the year ended 31 December 2018 the performance fee amounted to: 0.00%.	

The charges you pay as an investor in the Fund are used to cover the operational costs of the Fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

Ongoing charges are based on figures for the period ending 30th September 2019.

This figure may vary from year to year and does not include Fund transaction costs.

For more information about charges see the Fund's prospectus, available at www.johcm.com.

Performance of the Fund may be measured against the MSCI Emerging Markets NR (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. A performance fee of 15% is payable on the excess if the NAV outperforms the Index on an annual basis. The calculation is performed daily. Any underperformance is carried forward. This fee applies to all share classes. The use of the Index does not limit the investment decisions of the fund manager. Therefore the shareholdings of the Fund may differ significantly from those of the Index. The Index is used as it captures large and mid cap representation across 26 Emerging Markets (EM) countries with 1,194 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

Past performance

Past performance is not a reliable guide to future performance.

These performance results include ongoing charges and any performance fee taken from the Fund but do not include any entry charges that you might have to pay.

The share class came into existence in 2010.

Past performance has been calculated in GBP.
