FRANKLIN TEMPLETON

FTF ClearBridge Global Infrastructure Income Fund

Class X Income (Hedged) ISIN: GB00BD3FVS79

A sub-fund of: Franklin Templeton Funds II (the "Company")

Managed by: Franklin Templeton Fund Management Limited, part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to provide income. Growth of the fund's value in the long term is a secondary goal. The fund seeks to outperform, on an average annualised basis, the OECD G7 Inflation Index by 5.5% over an investment time frame of 5 years (gross of fees).

Investment Policy

- The fund invests at least 80% of its assets in shares of global listed infrastructure companies. However the fund may hold more or less of other permitted assets in extreme market conditions.
- The fund invests in a number of infrastructure sectors such as gas, electricity and water utilities, toll roads, airports, rail and communications.
- The fund invests in shares of infrastructure companies from around the world, including up to 20% from emerging market countries.
- The fund will usually invest in a concentrated portfolio, typically 30 to 60 companies.
- The fund may also invest up to 10% in global infrastructure companies that are not presently listed on an exchange, but are expected to be listed within 12 months of purchase, and in derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest in derivatives to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging transactions can expose the share class to additional risks which may result in loss to your investment.

Benchmark: The performance target to outperform the OECD G7 Inflation Index by 5.5%, on an average annualised basis over an investment time frame of 5 years, was chosen as it sets a reasonable performance target benchmark for the fund to achieve, taking into account a number of factors such as the measure of inflation across the G7 countries. Please refer to the prospectus for further information.

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmark does not constrain the investment manager's management of the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: For this share class net income is declared and paid quarterly to shareholders.

Risk and Reward Profile

Lower risk Potentially lower reward — **Higher risk** Potentially higher reward

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of infrastructure companies from various countries and sectors have historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Investment in infrastructure: The fund invests in shares of infrastructure companies, and the value of these shares can be negatively affected by economic or regulatory occurrences affecting their industries. Investments in new infrastructure projects carry risks where they may not be completed within the budget, agreed timeframe or specifications. Operational and supply disruptions can also have a negative effect on the value of the company's shares.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The investment manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Charges from capital: The fund's fees and expenses may be taken from its capital (rather than income). This will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.85%
Charges taken from the fund under certain specific conditions
