

7IM SUSTAINABLE BALANCE FUND, CLASS D (Accumulation)

Objectives and investment policy

The fund aims to provide a balance of income and capital growth.

The fund invests at least 80% of its assets in shares, corporate bonds and other funds (including exchange traded funds and open-ended or closed-ended funds) managed by selected fund managers. Up to 20% of the fund will usually be invested in liquid assets such as, cash, deposits, money market funds and money market instruments and warrants. The fund will comprise a balance of income-generating assets and assets with scope for capital growth. An assessment of Environmental, Social and Governance (ESG) issues is integrated into the investment process as part of the assessment and valuation work conducted on almost every investment to be made for the Fund (except where precluded by the asset type (e.g. liquid assets). This will include a specific screening process imposing investment restrictions and ethical conduct screening when applied to investment in shares and corporate bonds.

- Investment in other funds is determined on the basis of ESG screens and good stewardship.
- The fund has no specific target market, asset class or geographic sector.
- You can buy and sell shares in the fund on each UK business day.
- Income from the fund will be added to the value of your investment.
- Derivatives are used for investment purposes and to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The starting point for the Manager's investment process is identifying the best mix of asset classes to create a strategic asset allocation (SAA) customised for each 7IM risk profile. The SAA is then adapted to financial markets to enhance return and reduce volatility on a tactical basis using 7IM's tactical asset allocation process (TAA) making temporary and measured departures from the SAA. The investment strategy encompasses detailed ESG screening of the majority of assets.

The fund's performance may be compared to the IA Mixed Investment 20-60% Shares which has been chosen because it is representative of the fund's agreed risk profile and the type of assets in which it invests. It is therefore an appropriate comparator for the fund's performance.

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Diagram illustrating an array of size 7. The elements are indexed from 1 to 7. The element at index 4 is highlighted.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	2.16%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	0
-----------------	---

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund). For the interim period, the ongoing charges figure is based on annualised expenses for the reporting period to 31 May 2023. Where income is insufficient to pay charges the residual amount will be taken from capital. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking. You may also be charged a dilution levy on entry to or exit from the fund. For more information about charges, please see the prospectus, which may be obtained free of charge from the address in the 'Practical Information' below.

For any funds undertaking securities lending, the fund will receive 70% of the revenue generated and the remaining 30% will be received by Northern Trust as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the fund, this has been excluded from the ongoing charges.

Past performance

Source: FE fundinfo 2023

You should be aware that past performance is not a guide to future performance.

Fund launch date: 02/02/2007.

Share/unit class launch date: 02/02/2007.

Performance is calculated in GBP.

The past performance in the chart above is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
