JOHCM US Small Mid Cap Equity Fund

A GBP IE00BQT49290

A sub-fund of J O Hambro Capital Management Umbrella Fund plc
Managed by JOHCM Funds (Ireland) Limited

Objectives and investment policy

- The primary investment objective of the Fund is to achieve long-term capital appreciation.
- The Fund invests, under normal conditions, at least 80% of its assets in equity securities such as common stocks and preferred stock issued by smaller and mid-sized capitalization companies established or domiciled in the United States. The Fund primarily invests its remaining assets in equity securities of companies of no restricted capitalization which are established or domiciled in the United States. All of the equity securities in which the Fund invests will be listed or traded on a Recognised Market. The Fund may also invest in convertible preference shares, convertible bonds and collective investment schemes that invest in the types of securities in which the Fund would normally invest. Under normal circumstances, the Fund will hold securities of 45-60 companies. The Fund intends to compare its performance to the Russell 2500 Index (the "Index"), but the Fund is managed with no restrictions in terms of regional or sector allocation, within the United States, versus the Index.
- Performance of the Fund may be measured against the Russell 2500 Total Return Index (the "Index"). The Index is used as a target

benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund managers. Therefore the shareholdings of the Fund may differ significantly from those of the Index. The Index is A subset of the Russell 3000 Index that measures the performance of the small to mid cap (SMID) cap segment of the US equity market. The Russell 2500 Index includes the Russell 2000 Index plus the smallest 500 mid-cap companies from the Russell 1000 index based on a combination of market cap and current index membership.

- The Fund is actively managed which means that the fund managers use their expertise to pick investments to achieve the objective of the Fund.
- Any income the Fund generates for this share class will be reinvested annually to grow the value of your investment unless the shareholder elects for a cash dividend.
- You can buy and sell shares in the Fund, before 5.30pm, on any day which is a working day in Dublin.

Risk and reward profile

Lower risk				Higher risk		
Typically lower rewards				Typically higher rewards		
1	2	3	4	5	6	7

- The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on simulated historical performance data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- As this share class has not been in existence for 5 years, simulated performance data has been used.

The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund may invest in shares priced in currencies other than the currency of the share class. This may result in the value of the

share class increasing or decreasing due to changes in foreign exchange rates.

- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the fund value may be affected by:

- Changes in exchange rates between currencies may cause the value of the investments to diminish or increase.
- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and /or regulatory Risks
- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.	
Charges taken from the fund over a year	
Ongoing charge	0.90%
Charges taken from the fund under certain conditions	
Performance fee	
During the year ended 31 December 2018 the performance fee amounted to: 0.55%.	

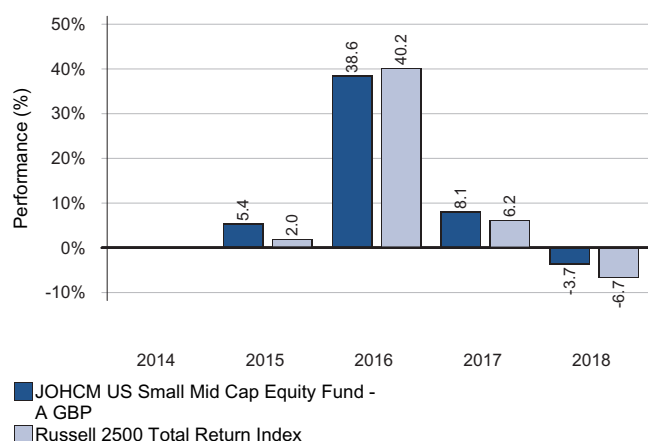

The charges you pay as an investor in the Fund are used to cover the operational costs of the Fund, including marketing and distribution costs. These charges reduce the potential growth of your investment. Ongoing charges are based on figures for the period ending 30th September 2019.

This figure may vary from year to year and does not include Fund transaction costs.

For more information about charges see the Fund's prospectus, available at www.johcm.com.

Performance of the Fund may be measured against the Russell 2500 Total Return Index (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. A performance fee of 15% is payable on the excess if the NAV outperforms the Index on an annual basis. The calculation is performed daily. Any underperformance is carried forward. This fee applies to all share classes. The use of the Index does not limit the investment decisions of the fund managers. Therefore the shareholdings of the Fund may differ significantly from those of the Index. The Index is a subset of the Russell 3000 Index that measures the performance of the small to mid cap (SMID) cap segment of the US equity market. The Russell 2500 Index includes the Russell 2000 Index plus the smallest 500 mid-cap companies from the Russell 1000 index based on a combination of market cap and current index membership.

Past performance

Past performance is not a reliable guide to future performance.

These performance results include ongoing charges and any performance fee taken from the Fund but do not include any entry charges that you might have to pay.

The share class came into existence in 2014.

Past performance has been calculated in GBP.
