Class A Accumulation

ISIN: GB00BVZ6VD94

A sub-fund of: Legg Mason Funds ICVC (the "Company")

Managed by: Legg Mason Investment Funds Limited, part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of the fund's value over periods of five or more years, through investment of at least 80% of its assets in US companies.

Investment Policy

- The fund will invest at least 80% of its assets in shares of companies based in or conducting the predominant part of their economic activity in the US. Such investment may be directly in such shares or indirectly via derivatives (financial instruments whose value is derived from the value of other assets).
- The investment manager seeks to identify shares of companies that have the potential to generate or sustain a high return on invested capital and have the potential to provide an attractive growth profile and/or cash flow generation over the long term.
- The fund will typically invest in 20 to 40 companies.
- The fund may invest up to 10% of its assets in other investment funds, which may include funds associated with the manager.
- The fund may invest in derivatives, to help try to achieve the fund's objective or to generate additional growth (investment purposes) as well as to reduce risk or cost for the fund (efficient portfolio management).

Benchmark: MSCI USA (Net Dividends) Index

Manager's Discretion: The fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The fund uses the benchmark for performance comparison purposes. While many of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The fund will also invest in securities that are not included in the benchmark. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

Lower risk Potentially lower reward — **Higher risk** Potentially higher reward

1	2	3	4	**5**	6	7

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of US companies across various sectors has historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.
