

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Euro Short Term Bond Fund, a Euro denominated sub fund of the Aberdeen Standard SICAV I, A Acc EUR Shares (ISIN: LU1646951316). This fund is managed by abrdn Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve income combined with the maintenance of capital by investing mostly in bonds (which are like loans that pay a fixed or variable rate of interest) priced in Euro and issued by international companies, banks and governments.
The Fund aims to outperform the FTSE EMU Government Bond 1–3 Years (ex BBB) Index (EUR) benchmark (before charges).

Investment Policy
Portfolio Securities

- The Fund invests at least two-thirds in Euro denominated bonds with a maturity of up to five years.
- The Fund will maintain a Euro currency exposure of at least 80% at all times.
- Bonds will typically have investment grade ratings. Up to 10% of the Fund may be invested in Sub-Investment Grade bonds.

Management Process

- The Fund is actively managed.
- The benchmark is also used as a basis for setting risk constraints but the Fund does not use a benchmark for portfolio construction.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the Fund's risk constraints, its performance profile is not ordinarily expected to deviate significantly from that of the benchmark over the longer term.

- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Fixed Income ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".
- Derivatives and Techniques**
- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.
- Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within three years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 2 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- Convertible securities are investments that can be changed into another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income. The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet

redemptions in a timely manner.
The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.
Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.69%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The ongoing charges figure is at 30/09/2021. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at www.abrdn.com.

PAST PERFORMANCE

Euro Short Term Bond Fund, A Acc EUR Shares, 31 December 2021

% Returns

Past performance is not a guide to future performance.

Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in EUR.

The fund was launched in 2017. The share/unit class was launched in 2017.

Performance prior to the launch date is based on the performance of Aberdeen Global II - Euro Short Term Bond Fund A-2 EUR Acc LU0513839588 which merged into this share class on 08/12/2017.

Benchmark - FTSE EMU Government Bond (1-3 Years) (ex BBB) (EUR) from 31/05/2012. FTSE EMU GBI (1-3 Years) (EUR) from 09/12/2000 to 30/05/2012.
