Objectives and Investment Policy

- The objective of the Fund is to achieve capital growth.
- The Fund invests in the full spectrum of permitted investments. This may include shares of companies, debt instruments from both developed and developing countries, cash and cash equivalents. Additionally, it may also invest into other Funds. Direct investment into high yield debt investments is limited to 15% of the fund's net assets. Debt instruments may be from corporate bodies, quasi government, as well as government/sovereign.

- The Fund may use derivatives (financial instruments whose value is linked to the expected future price movements of the underlying

- Any income is reinvested into the Fund.

Risk and Reward Profile

The risk category is calculated using either historical volatility or the risk limit of the fund, based upon methods set by European Union rules. It may not be a reliable indicator of the fund's future risk profile. It is not a measure of capital gain or loss is not guaranteed and may change over time. The lowest risk number does not mean risk free.

The share class is in the risk category indicated above due to rises and falls of its price or simulated data in the past. Share classes that seek to provide rewards with a low level of volatility are indicated by a 1-2, whereas a 3-5 indicates a medium level of volatility and 6-7 a high level of volatility.

Volatility is influenced by changes in stock market prices, currencies and interest rates, which can be affected unpredictably by diverse factors including political and economic events.

The significant use of derivative instruments may generate relatively high levels of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. Such leverage may result in greater fluctuations of the Net Asset Value of the Sub-Fund and therefore can result in a loss greater than the amount invested in the derivative itself.

Please note that the value of investments and any income you receive from them may go up as well as down. This means that you may not get back your original investment. The Fund does not offer any asset protection guarantees.

Currency risks, resulting from variations in exchange rates, may affect the value of your investment.

All the risks currently identified as being applicable to the Fund are set out in the "General Risk Considerations" section of the Prospectus.
