Objectives and Investment Policy

Objective

The Fund's investment objective is to generate long-term capital appreciation.

Investment Policy

• The Fund invests at least 70% of its net asset value in common stocks of US companies which are listed or traded on regulated markets in the United States listed in the Prospectus and that the investment manager believes are experiencing, or have potential to experience, growth of earnings and/or cash flow that exceed the average of companies having securities included in the S&P 500 Index.

• The Fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

• The Fund may also invest up to 20% in companies outside of the US.

• This is an Article 8 fund under the EU Sustainable Finance Disclosure Regulation.

• **Benchmark**: Russell 3000 Growth Index and S&P 500 Index

• **Manager's Discretion**: The Fund is actively managed. The investment manager has discretion in selecting investments within the fund's objective and investment policies. The benchmarks are used for performance comparison purposes. The Russell 3000 Growth Index is considered the fund's primary benchmark because it consists of growth securities, which is aligned with the investment manager's focus on growth securities in managing the fund. The performance of the S&P 500 Index may also be provided because it is considered a proxy for the US equity market. While most of the fund's securities will be components of one or both benchmarks, the weightings of the holdings may differ materially from the weightings in the benchmarks. The Fund may also invest in securities that are not included in the benchmarks. The Fund's percentage exposures to sectors and industries may differ materially from those of the benchmarks.

Fund's Base Currency: USD
Share Class Currency: USD

Risk and Reward Profile

1	2	3	4	5	**6**	7

Lower risk — Higher risk
Potentially lower rewards — Potentially higher rewards

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund invests in a concentrated manner (the fund holds fewer investments than many other funds) in shares of US companies from various sectors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Sustainability: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
