

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

New Capital Asia Pacific Equity Income Fund (the "Fund"), a sub-fund of New Capital UCITS Fund Plc (the "Company")

New Capital Asia Pacific Equity Income Fund USD O Inc. (the "Share Class") – ISIN: IE00B4XBVM68
The management company of the Fund is KBA Consulting Management Limited (the "Manager")

Objective and Investment Policy

Objective: The Fund's objective is to achieve a high level of income as well as capital appreciation.

Policy: The Fund will primarily invest in equities and equity-related securities (such as convertible bonds with fixed and/or floating rates of interest and issued by corporates) of companies that have their registered office in the Asia Pacific Region (excluding Japan) and which are listed or traded on Recognised Markets worldwide.

The investment strategy of the Fund is to invest in Asia-Pacific (ex-Japan) companies that offer a combination of attractive dividend yields with the potential for capital growth.

The Fund is permitted to invest less than 30% of its NAV in China A shares which are listed on the Shanghai Stock Exchange using the Shanghai-Hong Kong Stock Connect or the Shenzhen Stock Exchange using the Shenzhen-Hong Kong Stock Connect. Alternatively, the Fund may gain indirect exposure to China A shares via participatory notes issued by Qualified Foreign Institutional Investors and via investment in other collective investment schemes which primarily invest in China A shares.

The Fund may use techniques and instruments for purposes of efficient portfolio management including reduction of risk or cost, or the generation of additional capital or income for the Fund, with a level of risk which is consistent with the risk profile of the Fund such as forward foreign currency exchange contracts, futures contracts, options, put and call options on securities, indices and currencies, swap contracts.

The Fund will not be leveraged as a result of investment in derivatives for hedging purposes, although additional exposure,

not exceeding 20% of the Net Asset Value, may arise from investment in convertible bonds.

The Investment Manager has discretion in managing the investments of the Fund. Dividends on Income share classes will be paid bi-annually, with the exception of USD O Inc for which dividends will be paid quarterly. Accumulating share classes accumulate income.

Benchmark: The Fund's benchmark is MSCI AC Asia Pacific Ex-Japan and may be used for comparative purposes only. The Fund is actively managed and as such does not seek to replicate its benchmark index, but instead may differ from the performance benchmark in order to achieve its objective. The investment manager is not constrained by the benchmark in the selection of investments and may use its discretion to invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Profile of typical investor: The Fund is suitable for investors willing to take high risk whilst seeking capital growth and income over a medium term.

Dealing: Shares in the Fund can be bought and sold daily (every Business Day of the Fund).

Further information: Please refer to the Prospectus for more detailed information.

Risk and Reward Profile

The risk indicator is based on the volatility of the Fund's performance over the years the Fund has been in existence combined with simulated benchmark data.

The risk category shown is not guaranteed and may shift over time. Historical data may not be a reliable indicator for the future.

The lowest risk category does not mean a "risk-free investment". The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator.

Liquidity risk: The risk that assets may not be saleable immediately at a price consistent with that observed for valuation purposes.

Currency risk: Investors not investing in their local currency will additionally be exposed to the fluctuation of the exchange rate between their local currency and the currency class in which they are invested.

Hedging risk: The Fund utilises forward exchange rate contracts to minimise currency risk. Forward contracts do not precisely mirror movements in the market exchange rate which can result in differences in performance between share classes.

Further information: The Prospectus for this Fund gives you more details about all the risks for this Fund – see under "Practical Information" for how to obtain a copy.
