

### BlackRock Emerging Markets Absolute Alpha Fund

Class D Accumulating GBP

ISIN: GB00BSKRKZ12

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The Fund aims to achieve positive absolute returns on your investment (i.e. an increase in the overall value of the Fund) over a period of 12 months regardless of market conditions. As such, the Fund will not be managed against any emerging markets equity index.
- ▶ The Fund will be managed with the aim of delivering absolute (more than zero) returns on a 12 month basis in any market conditions. However, an absolute return is not guaranteed over a 12 month or any period and the Fund may experience periods of negative return. The Fund's capital is at risk.
- ▶ The Fund aims to gain investment exposure to equity securities (e.g. shares) and equity-related securities of, or giving exposure to, companies incorporated or listed in the emerging markets.
- ▶ In order to achieve its objective, the Fund invests at least 70% of its total assets in derivatives, equity securities and other equity-related securities and when determined appropriate fixed income (FI) securities (such as bonds), money-market instruments (MMIs), deposits and cash.
- ▶ Equity-related securities include derivatives. Derivatives are investments the prices of which are based on one or more underlying assets. MMIs are debt instruments with short-term maturities.
- ▶ The FI securities and MMIs may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may be investment grade (i.e. meet a specified level of credit worthiness), non-investment grade or unrated at the time of purchase.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held as cash to provide cover for the exposure created by the use of derivatives or to assist in achieving its investment objective.
- ▶ The investment adviser (IA) will use derivatives to achieve the Fund's investment objective. These will include synthetic short positions where the Fund uses a derivative to benefit from the sale of an asset which the Fund does not physically own with the aim of buying it later at a lower price to secure a profit.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and is not constrained by any benchmark in this process. LIBOR 3 Month (GBP) should be used by unitholders to compare the performance of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Due to its investment strategy an 'Absolute Return' fund may not move in line with market trends or fully benefit from a positive market environment.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 27 December 2019. This figure may vary from year to year. It excludes:

- Performance fees, where relevant.
- Portfolio trade-related costs, except costs paid to a custodian and any entry/exit charge paid by the Fund to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest

Performance Fee	20.00%#

# 20.00% of any returns that, subject to a high water mark, the Fund achieves above the LIBOR 3 Month. Further details are available in the Prospectus. The actual amount charged in the Fund's last financial year ending 28 February amounted to 0.33%.

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2015. The unit class was launched in 2015.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
