Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

The Fund is ranked as 5 because funds and portfolios holding similar assets have experienced medium to high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds equities concentrated in global infrastructure sectors which can carry a higher risk than funds holding more diversified assets by sector. The assets held by the Fund are predominantly equities which have exposure to or are directly associated with infrastructure assets, revenues and profits and these may experience higher return volatility than bonds or money market instruments and can also be sensitive to changes in interest rates, inflation and emerging market risks. The Fund invests globally but may hold a concentration in one geographical location. Funds concentrated in one geographic location are more vulnerable to market sentiment in that specific location and can carry a higher risk than funds holding more geographically diversified assets.

The level of income is not guaranteed and may not be achieved.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Interest rate risk:** infrastructure companies tend to hold relatively high levels of debt and their share price can be sensitive to an unexpected increase in interest rates.
- **Operational risk:** arising from investments in overseas markets, in particular emerging markets, which may not have the same level of safekeeping and other controls as more developed markets.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
