Objectives and Investment Policy

Investment Objective

The objective of the Fund is to grow capital over the long term, while at the same time minimising the overall level of risk in the Fund.

Investment Policy

The Fund invests in equity securities of Latin American companies listed or traded on regulated markets in Latin America, the Caribbean, North America and the EU, such as common stock, preferred stock, American depositary receipts and global depositary receipts.

The Fund may also invest in equity related securities such as warrants. The Fund may use index futures or put options on equity indices in order to seek to enhance returns, to attempt to hedge some of its investment risk, to manage portfolio duration or as a substitute position for holding the underlying asset. The Fund may also use forward foreign exchange contracts to hedge currency foreign exchange risks arising for hedged share classes.

In addition, the Fund may also invest in shares of other UCITS and exchange traded funds (up to 10% of the Fund's net assets) and equity securities which are not listed or traded on a regulated market (up to 10% of the Fund's net assets).

The Fund may also hold cash and money market instruments for ancillary purposes and debt securities, which may include corporate and government bonds (fixed and floating rate) and which may be of any credit quality or rating, if considered appropriate for the efficient operation of the Fund, for defensive purposes, or to be in the best interests of the Fund, for example, during periods of market uncertainty.

Latin American companies are considered by the Directors to include: (i) companies established in any Latin American country, Caribbean country or Mexico; (ii) companies which have a significant proportion of their assets in Latin America, the Caribbean or Mexico; or (iii) derive a significant proportion of their revenues, cash flow and/or profits from Latin America, the Caribbean or Mexico.

Recommendation: investment in the Fund is suitable for investors who can maintain a long term investment.

Benchmark

The Fund uses the FTSE All-World Emerging Latin America - Net Return index as a Comparator Benchmark to compare performance. The Fund is actively managed and is not constrained by any benchmark.

Risk and Reward Profile

The risk and reward indicator

This indicator is based on historical data and may not be a reliable indication for the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean your investment is risk free. The Fund's investments are subject to normal market fluctuations and other risks inherent in equities.
- The Fund is in category 7 as it mostly invests in equities, which typically experience higher levels of price fluctuation than other types of instruments.
- For a more detailed explanation of these and other risk factors, please refer to the section entitled Risk Factors in the prospectus and supplement.

Other particular risks:

Operational Risk: The Fund's operations depend on third parties, including the Fund's Administrator and Depositary, and the Fund may suffer disruption or loss in the event of their failure.

Equities Risk: Equity investments are subject to greater fluctuation in market value than other asset classes as a result of such factors as a company's business performance, investor perceptions, stock market trends and several economic conditions. This may cause the Fund's share price to fluctuate.

Liquidity Risk: The Fund may invest in securities which may, due to negative market conditions, become difficult to sell or may need to be sold at an unfavourable price. This may affect the overall value of the Fund.

Credit Risk: The assets of the Fund are exposed to the credit risk or bankruptcy of counterparties, dealers, exchanges and those that act on behalf of the Fund or hold assets on behalf of the Fund.

Market Risk: The Fund invests in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and generally less government supervision and regulation.

Currency Risk: The assets of the Fund may be in currencies other than US Dollars. The Impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
