BMO European Smaller Companies Ex UK Fund

Share Class: C Inc, a Fund of BMO Investment Funds (UK) ICVC III (ISIN GB00BVVB7M95).
This Fund is managed by BMO Fund Management Ltd.

Objectives and investment policy

The objective is to achieve a long term capital growth.

The Fund seeks to achieve this by investing primarily in equities (ordinary shares in companies) and equity related securities such as warrants (the right to purchase a security, usually an equity, at a specific price within a certain time frame) of small sized European companies (those companies falling within the bottom 25 per cent of the total market capitalisation of all publicly listed equity in Continental Europe). The Fund may also invest in medium sized and larger companies in order to enhance its liquidity.

While the Manager will invest mainly in equities, it may also hold liquid assets (cash and government bonds) on a short term basis up to 15% of the value of the Fund, as well as other transferable securities and collective investment schemes. The Fund may also use derivatives (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying equities) to hedge positions or to gain exposure to companies in order to manage the portfolio efficiently. The Fund uses derivatives in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of derivatives for these purposes within the Fund is not intended to materially alter the risk profile of the Fund.

Income generated by the Fund will be distributed annually.

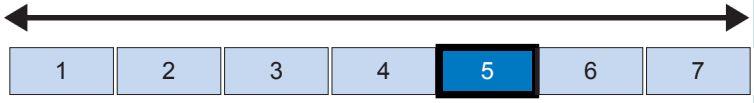

There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

You may buy or sell shares daily on demand (but not weekends or UK bank holidays or other days when the Fund is not open for dealing). Orders to buy or sell must be received by 12 noon (UK time) to receive the price calculated at that day's valuation point.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk — **Typically higher rewards, higher risk**

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Currency Risk: your investment may be adversely affected by changes in currency exchange rates.

Derivative Risk: derivative values rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Liquidity Risk: the ability to buy and sell assets at a favourable price may be affected by a low level of counterparties willing to enter into a transaction with the Fund.

Smaller Companies Risk: smaller companies carry a higher degree of risk and their value can be more sensitive to market movement.
