

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Emerging Markets Focused Equity Fund, a US Dollar denominated sub fund of the Aberdeen Standard SICAV II, D Acc GBP Shares (ISIN: LU1055713728). This fund is managed by abrdn Investments Luxembourg S.A.**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

The Fund aims to achieve a combination of growth and income by investing in companies in Emerging Market Countries, which adhere to the abrdn Emerging Markets Focused Promoting ESG Equity Investment Approach. The Fund aims to outperform the MSCI Emerging Markets Index (USD) benchmark before charges.

### Investment Policy

#### Portfolio Securities

- The Fund invests at least 70% of its assets in equities and equity related securities of companies listed, incorporated or domiciled in Emerging Market countries or having significant operations and/or exposure to Emerging Market countries.
- The Fund may invest up to 30% of its net assets in Mainland China equity and equity related securities including through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programmes or by any other available means.
- All equity and equity-related securities will follow abrdn's "Emerging Markets Focused Promoting ESG Equity Investment Approach".
- This approach utilises abrdn's equity investment process, which enables portfolio managers to qualitatively identify and avoid ESG laggards. To complement this research, the abrdn ESG House Score is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. Additionally, abrdn apply a set of company exclusions which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. More detail on this overall process is captured within abrdn's Promoting ESG Equity Investment Approach, which is published at [www.abrdn.com](http://www.abrdn.com) under "Sustainable Investing".
- Financial derivative instruments, money-market instruments and cash may not adhere to this approach."

### Management Process

- The Fund is actively managed.
- The Fund takes a focused investment approach to deliver an all-capitalisation concentrated portfolio of the highest conviction ideas of the investment team.
- Through the application of the Promoting ESG Equity Investment Approach, the Fund targets an ESG rating that is equal to or better, and a meaningfully lower carbon intensity, than the benchmark.
- Engagement with external company management teams is used to

evaluate the ownership structures, governance and management quality of those companies in order to inform portfolio construction.

- The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any sustainable criteria.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark and may invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark.

### Derivatives and Techniques

- The Sub-fund may utilise financial derivative instruments for hedging and/or investment purposes, or to manage foreign exchange risks. The use of derivatives for hedging and/or investment purposes is expected to be very limited, mainly in those cases where there are significant inflows into the Fund so that cash can be invested while the Fund's investments in equity and equity related securities is maintained.

Please note the fund has some limited exposure to Russian and/or Belarusian holdings. We will continue to follow developments very closely and will act in the interests of our customers. Further details are published at [www.abrdn.com](http://www.abrdn.com).

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 6 because of the extent to which the following risk factors apply:

- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal

framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.

- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to

the currencies within the fund. Such techniques also give rise to additional risks and costs.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

|              |       |
|--------------|-------|
| Entry charge | 5.00% |
| Exit charge  | 0.00% |

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

|                 |       |
|-----------------|-------|
| Ongoing charges | 1.14% |
|-----------------|-------|

### Charges taken from the fund under certain specific conditions

|                 |       |
|-----------------|-------|
| Performance fee | 0.00% |
|-----------------|-------|

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure is an estimate based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund. An estimate is used in order to provide the figure that will most likely be charged. The ongoing charges figure is at 30/04/2022.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus. For more information about charges, please see the Prospectus which is available at [www.abrdn.com](http://www.abrdn.com).

## PAST PERFORMANCE

Emerging Markets Focused Equity Fund, D Acc GBP Shares, 31 December 2021

% Returns

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.

Performance is calculated in GBP. The fund was launched in 2012. The share/unit class was launched in 2014.

Benchmark – MSCI Emerging Markets Index (GBP).
