This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL

Fund Services

IFSL Marlborough High Yield Fixed Interest Fund Class A Units

(ISIN Income GB00B03TN153)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide investors with income, that is, money paid out of your investment as interest, as well as the opportunity for some growth over a period of five or more years, however, there is no certainty this will be achieved.

At least 80% of the Fund will be invested in high yield bonds issued by companies and institutions. These will be sub-investment grade or unrated bonds, which are loans issued by entities which can be more vulnerable to changing market conditions that typically pay higher rates of interest than investment grade bonds.

The Fund may also invest in investment grade bonds, bonds issued by governments, bonds which may be converted into shares (known as convertible bonds), preference shares, permanent interest bearing shares and money market instruments (which are shorter term loans). Whilst the Fund will not buy shares in companies there may be times where the Fund holds shares following a restructuring of an existing holding.

The Fund is actively managed which means the investment team decides which investments to buy or sell and when. Investment decisions are taken based on individual company research in addition to the team's view on global economic and market conditions.

The investment manager uses the ICE Bank of America Merrill Lynch European Currency High Yield Constrained (hedged to sterling) Index as a reference point

when constructing the portfolio and for risk management purposes.

The Fund uses derivatives (instruments whose returns are linked to another asset, market or other variable factor) and forward transactions linked to exchange rates, for the purposes of efficient portfolio management in order to reduce currency risk in the Fund, also known as hedging.

The Fund will typically hold less than 5% in cash to enable the ready settlement of liabilities, for the efficient management of the Fund and in pursuit of the Fund's objectives although may occasionally exceed this figure.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Sterling High Yield sector. You may want to assess the Fund's performance compared to the performance of this sector.

The IFSL Marlborough High Yield Fixed Interest Fund pays income. If you wish to receive this please tell us. If you do not want to receive income we will reinvest it to buy more units for you.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this unit class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 4 because its investments have experienced moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with perceived lower credit quality.
- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

Risks which are not adequately captured by the risk indicator include:

Bonds that produce a higher level of income carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.

- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.

- The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 30/06/2023. This share class has benefited from expense funding whereby some of the charges outlined in the prospectus have been fully or partially funded. Without this expense funding it is anticipated the OCF would be higher and potentially to the extent of having a noticeable impact on the returns investors receive. When this expense funding ceases if the OCF is expected to increase by an amount greater than 5% of its current value, Investment Fund Services Limited will give investors 60 days' written notice. Charges may vary from year to year. It excludes: It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 15 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest
