Objectives and Investment Policy

OBJECTIVE

To provide income together with the potential for capital growth over the long term (5 years or more).

POLICY

The Fund will:

- invest at least 80% of the portfolio in UK listed equities (company shares) and equity-related securities mainly of large companies which it believes offer more stable cash flows;
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income; and
- to generate additional income the Fund may enter into call options either as a buyer or a seller. As a buyer this gives the right, but not the obligation, to buy shares in the future at a fixed rate, therefore guaranteeing the purchase price. As a seller they agree to give the buyer of the option the underlying shares, at the agreed price, if the buyer exercises their option rights.

The Fund may:

- invest in money market instruments, deposits, cash and near cash; and

- invest up to 10% in other collective investment schemes (including but not limited to another Sub-Fund or Sub-Funds of the Company).

Benchmark: The Fund will measure its performance against the FTSE All-Share TR Index as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator because it is representative of the UK equity market.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments subject to the investment objective and policies disclosed in the Prospectus. While the Fund's holdings may include constituents of the Benchmark, the selection of investments and their weightings in the portfolio are not influenced by the Benchmark. The investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Treatment of income: income from investments will be paid to shareholders monthly on or before the second last business day of each month.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 1,000.

Risk and Reward Profile

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 6 because its historical value has shown relatively high volatility. With a Fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Charges to Capital:** The Fund takes its charges from the capital of the Fund. Investors should be aware that this has the effect of lowering the capital value of your investment and limiting the potential for future capital growth. On redemption, you may not receive back the full amount you initially invested.
- **Real Estate Investment Trust (REITs) Risk:** The Fund is subject to risks associated with investing in real estate which may include but is not limited to liquidity constraints arising from difficulties with the disposal of the underlying properties, fluctuations in the value of underlying properties, defaults by borrowers or tenants, market saturation, changes in general and local economic conditions, decreases in market rates for rents, increases in competition, property taxes, capital expenditures or operating expenses and other economic, political or regulatory occurrences affecting companies in the real estate industry.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

- **High Yield companies risk:** Companies with high-dividend rates are at a greater risk of not being able to meet these payments and are more sensitive to interest rate risk.
- **Capital Depreciation Risk:** The Fund undertakes investment activities that are designed to maximise the generation of income. This may result in a reduction of capital.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
