

KEY INVESTOR INFORMATION

Eaton Vance International (Ireland) U.S. Value Fund (the "Fund")
a sub fund of Eaton Vance International (Ireland) Funds plc (the "Company")
Class A Acc GBP (H) (IE00B0Y4JW23) (the "Share Class")
Managed by MSIM Fund Management (Ireland) Limited (the "Manager")

Objectives and Investment Policy

The Fund aims for long-term growth in the value of your investment.

The Fund will invest in a wide range of companies which it believes are priced inexpensively compared to other companies. At least 2/3 of assets will be invested in companies from, or which generally make 50% of their profits or revenue from, the United States ("U.S."). The Fund may, however, invest up to 20% in non-U.S. companies, however, the Investment Adviser may set such limit at a lower level from time to time. The Fund will not invest more than 25% in any one industry.

The Fund is actively managed in reference to the Russell 1000 Value Index (the "Index"). The Fund does not intend to track the Index, therefore the Fund's performance may deviate materially from that of the Index. While the Fund will invest in securities which are constituents of the Index, the Investment Adviser has discretion in its choices of investments and is not constrained in its selection of its investments by the Index save that the Investment Adviser will typically limit variance in sector weighting to 5% compared to the Index and active weight to 5% in single stock positions relative to the Index. The Index is used as a performance comparator.

The Fund may invest in instruments which are not included in the Index, although it is generally expected that a significant portion of its investments will be constituents of the Index at any given time.

In certain circumstances, the Fund may hold cash and/or other assets which can be easily converted into cash.

Currency forwards (which are agreements to buy or sell currency at the exchange rate on the contract date but to deliver the currency on a specified future date) are used to hedge (or reduce the currency risk of investment in) the classes of the Fund denominated in Euro and Sterling.

Currency exposures can arise due to changes in the exchange rates between the currency of this class (Sterling) and the currency in which the Fund is valued (U.S. Dollars) (the "Base Currency").

Any income earned on investments will be added to the value of the Fund.

You can buy and sell your shares daily during Fund business hours.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk rating of the Share Class is calculated using a standard methodology used by all UCITS funds, and shows where the Share Class ranks in terms of its relative risk and potential return based on past share price fluctuation.

The Share Class has a risk rating of 6 because of past rises and falls in its value.

Using such past information may not reliably predict how the Share Class will perform in the future.

Its ranking is not guaranteed and may change over time. The lowest risk class does not mean the investment is risk free.

The following risks may not be captured by the risk and reward indicator:

- The value of investments and income from them can go down as well as up and you may not get back the full amount you invested.
- Shares are subject to risks arising from economic, political and regulatory developments, and market turmoil. Such risks may be more likely in emerging markets.
- At times there may be insufficient buyers and sellers to allow the Fund to buy and sell investments readily.
- Many people, processes and systems are involved in operating the Fund, and these could fail and cause a loss to your investment or a failure to return property of the Fund.
- This class is hedged from Sterling back to the Base Currency of the fund. This hedging may not be successful, so changes in exchange rates may lead to fluctuations in the value of your investment.
- A more complete description of the risk factors is set out in the prospectus and in the supplement for the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00 %
Exit charge	None
This is the maximum that might be taken out of your money before it is invested/the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charge	1.73 %
Charges taken from the Fund under specific conditions	
Performance fee	None

Any entry or exit charges shown are the maximum figures. In some cases you might pay less. You should refer to your financial advisor for more details.

The ongoing charge is based on the previous year's expenses for the year ending December 2021. This figure may vary from year to year. It excludes portfolio transaction costs.

You can find out more details about the charges by looking at the prospectus in the sections headed "Fees and Expenses".

Past Performance

Past performance is not a reliable indicator of future results.

The past performance takes account of all charges and costs, except for any entry or exit charges.

The value of this Share Class is calculated in Sterling.

The Fund was launched on 29 August 2002 and this Share Class commenced on 26 May 2006.

The Fund is not designed to track the Index.

Practical Information

The Fund's assets are held with its depositary, Citi Depositary Services Ireland Designated Activity Company. The Fund is a sub-fund of the Company.
