Barings Dynamic Capital Growth Fund
Class I GBP Inc - ISIN No. GB00B8DFR284

The Fund is a Unit Trust. Baring Fund Managers Limited is the Manager of the Trust.

OBJECTIVE AND INVESTMENT POLICY

Objective: To provide capital growth by investing globally.

Investment Policy: To invest directly and indirectly in a range of asset classes globally such as company shares, bonds (such as those issued by governments, sovereigns, supranationals and companies globally), money market instruments and/or cash. The Fund's exposure to indirect investments may be gained through other funds (including those managed by Barings or associated companies), transferable securities, alternative investments and derivatives. The fund is actively managed and is not managed in reference to a benchmark. The investment manager has discretion in the choices of investments in order to achieve the fund's objective. The Fund is designed to be flexible and invests in opportunities considered best, depending on the view of the market cycle.

- The Fund may use derivatives (investments whose value is linked to other assets or to the performance of a stock exchange or some other variable factor, such as interest rates) for investment purposes or to manage the Fund in a way that is designed to reduce risk or cost and/or generate extra income often referred to as efficient portfolio management.

Distribution Policy: Any income generated will be automatically reinvested in more units/shares of the same class unless payment is specifically requested.

Dealing Frequency: Normally 12 noon (London time) Monday to Friday unless it is a UK public holiday or a day on which the London Stock Exchange is not open for business.

Minimum recommended holding term: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full details on the Objective, Investment Policy and the Distribution Policy please refer to the prospectus.

RISK AND REWARD PROFILE

Lower risk — **Higher risk**

Typically lower rewards — **Typically higher rewards**

1	2	3	**4**	5	6	7

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time, the higher the number the greater the price movement both up and down. It is calculated using historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated above due to the nature of its investments which include the risks listed below. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest.

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- The rating of a bond can change. There is no guarantee that a bond issuer will pay the interest due or repay the loan (bonds that produce a higher level of income are at a greater risk of default). Bond values are likely to fall if interest rates rise.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Where the Fund invests in other funds it will be subject to the risks of those other funds and the returns of the Fund may be substantially adversely affected by unfavourable performance of such funds.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
