First Sentier Investors (UK) Funds Limited, the authorised corporate director of the Company

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve an investment return from income and capital appreciation.

Policy: The Fund invests at least 80% in fixed income securities (investments which provide a certain level of income or interest) issued primarily by governments and companies in emerging markets.

The majority of investments in the Fund will be in US Dollars.

The Fund may invest without limitation in investment grade and non-investment grade securities.

The Fund may invest up to 10% in other funds.

Emerging market countries are those included in the Fund's benchmark or are classified as middle or low-income by the World Bank.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Manager's strategy is designed to deliver performance in markets driven by both top-down (macro) and bottom-up (country specific) factors. This approach enables the team to deliver more consistent risk adjusted performance, in varied market conditions. The research process is systematically forward looking, disciplined and repeatable. The Manager aims to identify instances where market

consensus has become too bullish (expectation that the market price will increase) or too bearish (expectation that market price will fall) and find investment opportunities.

Benchmark: The Fund's performance is compared against the value of the J.P. Morgan EMBI Global Diversified Index and the Fund is included in the Investment Association's Global Emerging Markets Bond Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 4 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.
- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency hedged share class risk:** hedging transactions are designed to reduce currency risk for investors. There is no guarantee that the hedging will be totally successful or that it can eliminate currency risk entirely.
- **Interest rate risk:** bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- **Credit risk:** the issuers of bonds or similar investments that the Fund buys may not be able to meet their interest payments or repay their debt which could lead to loss. The risk may be greater for investments in bonds with low or no credit rating.
- **Below investment grade debt securities risk:** below investment grade debt securities are speculative and involve a greater risk of default and price changes than investment grade debt securities. In periods of general economic difficulty, the market prices of these types of securities may decline significantly.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	N/A

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	1.58%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	N/A
-----------------	-----

The entry and exit charges shown are the maximum you will need to pay. In some cases you might pay less - you can find out the actual entry and exit charges from your financial adviser.

The ongoing charge is based on expenses for the year ending July 2020. It may vary from year to year. It excludes portfolio transaction costs which are paid from assets of the Fund and performance fees, if any.

There are fees for switching between sub-funds. The fee for switching into the Fund is 0.5%.

The fees and expenses are charged against the capital of the Fund. Deducting expenses from capital reduces the potential for capital growth.

Further information can be found in the Buying, Selling and Switching Shares section of the Company's prospectus.
