Franklin Mutual Shares Fund

Class W (acc) • ISIN GB00B768TX26 • A sub-fund of Franklin Templeton Funds
The management company is Franklin Templeton Fund Management Limited

Objectives and Investment Policy

Franklin Mutual Shares Fund (the "Fund") aims to increase the value of its investments and, to a lesser extent, to earn income over the long term.

The Fund invests mainly in:

- equity securities issued by companies of any size located in, or doing significant business in, the U.S.
- lower-quality debt securities issued by companies located in, or doing significant business in, the U.S.

The Fund can invest to a lesser extent in:

- equity securities issued by companies involved in mergers, consolidations, liquidations or other major corporate transactions
- debt securities issued by companies involved in reorganisation or financial restructuring
- equity or debt securities from issuers of any size located in any country

The investment team uses in-depth fundamental research and analysis to find and purchase those equity and debt securities that are believed to be selling at a price below their intrinsic value, with the potential to grow in value over the

long term.

The Fund can use derivatives for efficient portfolio management (managing the fund in a way that is designed to reduce risk or cost and/or generate extra income or growth).

The Fund's performance is compared to the S&P 500 Index as it is widely available and reflects investments in the US stock market.

You may request the sale of your shares on any UK business day.

The income received from the Fund's investments is accumulated and included in the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

Terms to Understand

Debt securities: Securities representing the issuer's obligation to repay a loan at a specified date and to pay interest.

Equity securities: Securities that represent an ownership stake in a company.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund invests mainly in equity and debt securities of U.S. companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

*This share class is only available through certain financial advisers which may apply their own charges. You may find more information about charges from your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2019. This figure may vary from year to year.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds.

Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP
- The Fund was launched in 2003 and the present share class on 31/05/2012.
- The Fund's performance is compared to the S&P 500 Index as it is widely available and reflects investments in the US stock market.

The past performance up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.
