Schroder Multi-Asset Total Return Fund

a sub-fund of Schroder Investment Fund Company

Class L Accumulation GBP (GB00BYXYW887)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth and income of the ICE BofA Sterling 3 Month Government Bill Index + 4% per annum (before fees have been deducted*) over rolling three year periods by investing in a diversified range of assets and markets worldwide. The fund also aims to target a volatility (a measure of how much the fund's returns may vary) range of 4% - 8% over the same period. This cannot be guaranteed and your capital is at risk.

*For the target return after fees for each unit class please visit the Schroder website <https://www.schroders.com/en/uk/>

Investment Policy

The fund is actively managed and invests directly, or indirectly through collective investment schemes, exchange traded funds, real estate investment trusts and closed ended funds, in equities, bonds, commodities and currencies worldwide. The weightings of these holdings are adjusted in response to changing market conditions.

The fund may invest more than 10% of its assets in collective investment schemes (including other Schroder Funds).

The fund may invest in below investment grade securities (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) or in

unrated securities.

The fund may also invest in warrants and money market instruments, and may hold cash.

The investment strategy of the fund and its use of derivatives may lead to situations when it is considered appropriate that prudent levels of cash or cash equivalent liquidity will be maintained, which may be substantial or even represent (exceptionally) 100% of the fund's assets.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark of the ICE BofA Sterling 3 Month Government Bill Index + 4% per annum. The fund also aims to target a volatility (a measure of how much the fund's returns may vary) range of 4% - 8% over the same period.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

The risk and reward indicator

The risk category was calculated using simulated historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign

exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2022 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail share classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this share class of the fund is 0.77%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 28/04/2017.
