Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- This Fund holds a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- Smaller company shares can be riskier as they may be more difficult to buy and sell and their share price may fluctuate more than that of larger companies.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund's performance, potentially reducing your returns.
- For further risk information please see the prospectus.
