

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Jupiter Asset Management Series PLC - Jupiter Financials Contingent Capital Fund (the 'Fund'), a sub-fund of Jupiter Asset Management Series PLC

1 GBP Hedged Acc (ISIN - IE00BF47CV65)

The Manager is Jupiter Asset Management (Europe) Limited (the "Manager")

Objectives and Investment Policy

Objective: a total return comprised of income and long-term capital growth.

Policy: in seeking to achieve its investment objective, the fund will aim to deliver a return, net of fees, greater than that of the Bloomberg Barclays Contingent Capital Western Europe Index (USD Hedged) over rolling 3 year periods.

The Fund will invest in a diversified range of bonds and similar debt investments with fixed and variable interest rates.

Typically at least 75% of the invested assets will be held in contingent convertible bonds ("CoCos") issued by banks, finance and insurance companies. A CoCo is a type of bond which, upon a pre-specified trigger event, may convert into a set number of company shares, or may be subject to a partial or full write-off. Examples of trigger events include pre-defined capital ratios of the issuer falling to a particular level, or the issue/issuer being subject to a regulatory action or decision by the responsible regulator in the issuer's home market.

The Fund may invest up to 100% in sub-investment grade bonds and similar debt investments (e.g. those with a rating of below BBB- as rated by Standard and Poor's or below Baa3 by Moody's).

For those investments not denominated in US Dollars, the Fund may use techniques to try to reduce the effects of changes in the exchange rate between US Dollars and other currencies (i.e. hedging). This aims to protect the Fund against losses caused by currency movements between the Fund base currency, US Dollars, and the currency of the non US Dollar denominated assets of the Fund.

The Fund uses derivatives (i.e. financial contracts whose value is linked to the expected price movements of an underlying investment), with the aim of generating returns and/or reducing the overall costs and risks of the Fund.

The Fund is actively managed. Portfolio construction is driven by an on-going

assessment of the drivers of returns such as interest rates, bond prices, economic outlook, inflationary expectations and global political issues. This will also include an assessment on any issuers' default risk and value relative to similar bonds in the market.

The Index is a broad representation of the Fund's investment universe. Although a large proportion of the Fund's investments may be components of the Index, the Fund has the ability to deviate significantly from the Index.

Portfolio transaction costs are paid out of the assets of the Fund in addition to the charges set out below, and may have an impact on the performance of the Fund.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Treatment of income: as shares in this class are accumulation shares, income from investments will be reinvested into the Fund and reflected in the value of the shares.

Dealing: you can buy and sell shares on business days where retail banks are open for business in Dublin and London (excluding Saturdays, Sundays and public holidays).

Hedging policy: The Fund also aims to protect against exchange rate movements between the Fund's base currency and the share class currency by hedging.

Risk and Reward Profile

The calculated risk and reward category, as shown above, uses a method of calculation derived from EU rules. It is based on the rate at which the returns of the Fund have moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment. The seven-category scale is nonlinear, for example, 2 is not twice as risky as 1.

- Funds in category 5 have in the past shown moderately high volatility. With a fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.
- Investment risk** - there is no guarantee that the Fund will achieve its objective. A capital loss of some or all of the amount invested may occur.
- Strategy risk** - investments in contingent convertible bonds may result in material losses to the Fund based on certain trigger events. The existence of these trigger events creates a different type of risk from traditional bonds and may result in a partial or total loss of value or alternatively they may be converted into shares of the issuing company which may also have suffered a loss in value.
- Currency risk** - the Fund is denominated in USD and may use hedging techniques to try to reduce the effects of changes in the exchange rate between the currency of the underlying investments and the base currency of the Fund. These techniques may not eliminate all currency risk. This share class is denominated in GBP and aims to hedge the share class currency to the base currency. The hedging process may not give a precise hedge. The value of your shares may rise and fall as a result of exchange rate movements.
- Credit risk** - the issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

- Interest rate risk** - investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.
- Liquidity Risk (less liquid securities)** - some investments may be hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.
- Derivative risk** - the Fund uses derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.
- Capital erosion risk** - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges.
- For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out. In some cases, you might pay less and you can find out the actual entry and exit charges from your financial adviser or distributor.

Charges taken from the Fund over a year

Ongoing charges	0.95%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

- These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. Overall, they reduce the growth of your investment.
- The ongoing charges figure is based on the expenses of the Fund for the 12 month period ended December 2023. Where the Fund invests in other underlying funds, which may include closed-ended funds such as investment trusts, the ongoing charges figure will include the ongoing charges for those funds, and will therefore vary from year to year. The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- It is not the intention for a switching charge (2.50%) to apply but the Fund reserves the right to impose a switching charge in the future.
- You can find out more details about the charges by looking at the *Fees and Expenses* section of the prospectus.

Past Performance

- Past performance is not a guide to future performance.
- The Fund launched on 14 August 2017. This class started to issue shares on 14 August 2017.
- The value of the class is calculated in GBP. No index is available to provide a useful performance comparison for this hedged share class.
- The past performance shown does not take into account any entry or exit charges but does take into account the ongoing charge, as shown in the Charges section.

Practical Information

- The Fund's assets are held with its depositary, Citi Depositary Services Ireland Designated Activity Company.
- Jupiter Financials Contingent Capital Fund is a sub-fund of Jupiter Asset Management Series Plc (the "Company"). The assets of this sub-fund are segregated from other sub-funds in the Company.
- Further information about the Company, copies of its prospectus, annual and half-yearly reports may be obtained, for the entire Company, free of charge (the prospectus is available in English and other required languages) from the administrator, Citibank Europe plc, at 1 North Wall Quay, Dublin 1 Ireland or visit www.jupiteram.com.
- Details of the remuneration policy are available at www.jupiteram.com and a paper copy can be made available free of charge upon request.
- The latest share prices are available from the administrator during normal business hours and will be published daily at www.jupiteram.com.
- You may switch your shares to the shares of another sub-fund of the Company. A fee may apply. For further details, please refer to the Conversion of Shares section in the prospectus.
- This Fund is subject to tax laws and regulations of Ireland. Depending on your home country of residence, this might have an impact on your personal tax position. For further details, please speak to your financial adviser.
- The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate, or inconsistent with the relevant parts of the prospectus for the Company.
