This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## OBJECTIVES AND INVESTMENT POLICY

The Fund’s objective is to achieve long term capital growth.

The Fund is actively managed, and seeks to achieve its objective through investment in, predominately, shares of companies located anywhere in the world, but limited to 20% of NAV of shares of companies located in emerging market countries.

The Fund may also invest up to 20% of NAV in Fixed Income Securities and MMI and up to 10% of NAV in other investment funds, including exchange traded funds.

The Investment Manager seeks to identify investments that will increase in value over time based on analysis of various factors relating to the issuer’s business and capabilities in relation to cash generation, re-use of cash and business model.

The Fund does not utilise FDI or hedge currency exposures.

Any income or gains of the Fund (net of expenses) will be accumulated and reinvested into the assets of the Fund.

Investors can buy, sell or switch shares on any day on which banks in Ireland and London are open for regular business (“Dealing Day”). Applications must be received by the Administrator by 12 noon (Irish time) on the relevant Dealing Day.

For full investment objective and policy details, please refer to the “Investment Objective” and “Investment Policies” sections of the Fund’s supplement (the “Supplement”).

*Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money in the short term (within 5 years). The Fund should be viewed as a longer term investment.*

**FDI:** a derivative contract between two or more parties whose value depends on the rise and fall of the relative value/price of a referenced underlying asset.

**Fixed Income Securities and MMI:** may include but are not limited to various types of bonds and money market instruments of corporate issuers, government and public international bodies. Such securities may be of any maturity, fixed interest rate, and of any credit rating.

**NAV:** net asset value of the Fund.

## RISK AND REWARD PROFILE

The Fund is in category 6 as assets it holds have historically been subject to relatively high levels of price fluctuation. The category shown is not guaranteed and may change over time. It is based on simulated data and may not be a reliable indication of future circumstances. The lowest category does not mean a risk free investment.

The Fund is exposed to additional risks not captured by the risk indicator including, without limitation:

**Company Shares Risk:** the values of shares of companies are subject to changes in the issuing company’s financial condition and overall market and economic condition as well as market perception.

**Currency Risk:** changes in exchange rates may reduce or increase the value of non-GBP denominated assets held by the Fund, which may impact the overall NAV regardless of the performance of the relevant assets themselves.

**Counterparty Risk:** a party with whom the Fund contracts for investments or to safekeep assets may fail to meet its obligations or become bankrupt, which may expose the Fund to a financial loss.

**Emerging Market Countries Risk:** emerging market securities are subject to greater social, political, regulatory, and currency risks than developed market securities. This may impact the liquidity and value of such securities and, consequently, the value of the Fund.

**Operational Risk:** human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.

These risk factors are not exhaustive. Please review the “Risk Factors” sections in the Company’s prospectus (the “Prospectus”) and Supplement.
