### Lazard Sterling High Quality Bond Fund A Dist GBP

Lazard Sterling High Quality Bond Fund is a sub-fund of Lazard Global Active Funds Public Limited Company (the "UCITS")

ISIN: IE00B04NK044

This Fund is managed by Lazard Fund Managers (Ireland) Limited, part of the Lazard Group

## Objectives and Investment Policy

Lazard Sterling High Quality Bond Fund (the "Fund") aims to achieve attractive returns through investment in an actively managed portfolio of sterling denominated fixed income securities (i.e. bonds).

The Fund will invest in the Regulated Markets of OECD countries with an investment grade rating, with the aim of achieving greater total return than the iBoxx Sterling Overall Index (the "Benchmark"). The Benchmark comprises the market weighting of all sterling denominated investment grade UK gilts, sovereign, supranational and corporate bonds with more than one year to maturity. The fixed income securities that the Fund will invest in will be investment grade securities of the type comprised in the Benchmark, although certain investments may have less than one year to maturity.

The Fund may also invest up to 10% of its value in units or shares of other investment funds (including exchange traded funds).

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment), for the purposes of efficient portfolio management.

You can buy and sell shares in the Fund on any day on which the stock exchanges in London and Frankfurt are open for business.

The Fund has discretion as to which investments it will hold within the limits of the Investment Objective and Policy.

Any distributions that are paid to you will normally be reinvested to buy further shares unless you have elected to receive payment in cash.

The Fund aims to outperform the Benchmark. However, the Fund has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within the short term.

## Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee.

The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this share class is calculated on the basis of historic volatility – i.e. how much the value of the underlying assets of the Fund has fluctuated over the last 5 years.

This share class has been placed in the risk category stated above, because based on the historic data, the underlying assets within the Fund have shown moderate volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you invested.
  - Investment in lower rated bonds increases the risk of default on repayment and the risk to capital of the Fund.
  - There is a risk that the other side to certain contracts that the Fund may enter into may not be able to meet obligations. For example, this may arise in the Fund where an investment is made using a derivative or a debt instrument, and the other side to the agreement becomes insolvent, or is otherwise unable to meet its obligations. In such a case, the Fund may incur loss.
  - The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses.
  - More than 35% of the Fund may be invested in fixed interest securities issued by a single government. If any such single government were to fail to meet its obligations, the impact on the Fund would be material.
  - The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, and the currency of the Fund's investments, your share class and your home currency.
- See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
