

Key Investor Information Maple-Brown Abbott Asia Pacific ex-Japan Fund (the “Fund”)

a sub-fund of Maple-Brown Abbott Funds p.l.c. (“the Company”)

Share Class: Institutional GBP | ISIN: IE00B284Z023

The Manager of the Company is Kroll (Ireland) Management Company Limited (the “Manager”)

This document provides you with key investor information about this Fund. It is not marketing material. This information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

- The Fund aims to outperform the MSCI All Countries Asia Pacific Excluding Japan Net Index (US\$) (the “Benchmark”) over rolling four year periods. There can be no guarantee that the investment objective of the fund will actually be achieved.
 - The Fund is considered to be actively managed as the Fund seeks to outperform the Benchmark. The Fund may hold securities not held by the Benchmark, but the majority of the Fund’s securities are likely to be components of the Benchmark with a divergence in security and sector weightings as Maple-Brown Abbott Limited (the “Investment Manager”) uses its discretion to take advantage of investment opportunities. The investment strategy and geographic focus of the Fund will restrict the extent to which the Fund’s holdings may deviate from the Benchmark.
 - It is intended that at least two thirds of the Fund’s total assets will be invested in listed Asia Pacific equities either directly in local markets, or indirectly through Global and American Depositary Receipts (“GDRs” and “ADRs”) listed on the European and North American stock exchanges. For the purpose of the Fund, Asia Pacific includes Australia, China, Hong Kong, Taiwan, Singapore, Malaysia, New Zealand, Pakistan, Philippines, Thailand, South Korea, Indonesia, Vietnam and India. Generally, the companies the Fund intends to invest in will have a market capitalisation greater than US\$500 million.
 - Investments may also be made in unlisted equities, provided that they are expected to be listed within 3 months from the date of investment.
 - The Fund may engage in transactions in financial derivative instruments for investment and/or the purpose of efficient portfolio management. A derivative is a financial instrument whose value is based on the performance of another financial asset, index or investment.
 - Although the use of derivatives (whether used for hedging or investment purposes) may give rise to additional exposure, this will not exceed the net asset value of the Fund.
 - The Fund will seek to buy investments that offer relatively good long term value as measured by a number of traditional indicators.
 - All income earned will be accumulated and reflected in the net asset value per share.
 - This Fund may not be appropriate for investors who plan to withdraw their money within four years.
 - Investors can buy, sell or switch shares daily.
- For more information on the objectives and investment policy of the Fund please see the Prospectus at maple-brownabbott.com.au.

Risk and reward profile

Lower risk ----- Higher risk
Typically lower rewards ----- Typically higher rewards

- The risk indicator has been created using historical data and may not be a reliable indication for the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.

The Fund has been rated a six because the securities and instruments in which the Fund invests are subject to normal market fluctuations and other risks associated with investing in such investments and no guarantee can be given that their value will appreciate.

Materially relevant risks not adequately captured by the risk indicator include:

- Emerging market risk: A significant portion of the Fund’s assets may be invested in emerging markets which may have additional potential risks including lower regulatory standards, less developed settlement systems and economic and political instability.
- Market risk: Some of the Recognized Exchanges in which a Fund may invest may be less well-regulated than those in developed markets and may prove to be illiquid, insufficiently liquid or highly volatile from time to time. This may affect the price at which a Fund may liquidate positions to meet redemption requests or other funding requirements.
- International investment risk: The risk that changes in foreign exchange controls, imposition of confiscatory and withholding taxes, changes in government or economic monetary policy, appropriation of assets,

political or economic instability, less rigorous financial reporting or auditing standards, potential difficulties enforcing rights and contractual obligations, and extended settlement periods have an adverse effect on the value of an investment.

- Currency risk: We invest in a number of countries. If the value of their currencies changes relative to other currencies in the Fund, the value of the investment can change.
- Liquidity risk: The Fund has the flexibility to invest a small portion of the portfolios capital in securities or investments that are not listed or rated and consequently liquidity in these investments may be lower.
- Sustainability risk: The Fund’s integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the Fund and may cause the Fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the Fund’s investments and negatively affect the returns of the Fund.
- Counterparty risk: The Fund may be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

For a more detailed explanation of these and other risks, please refer to the “Risk Factors” section of the Prospectus and Supplement for the Fund.

Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of your investment.

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser or the Investment Manager.

One-off charges taken before or after you invest

Entry charge	Nil ¹
Exit charge	Nil ²

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investment paid out.

Charges taken from the Fund over the year

Ongoing charges	0.86% ²
-----------------	--------------------

Charges taken from the Fund under certain specific conditions

Performance Fee	Nil
-----------------	-----

¹ The Company reserves the right to impose “an anti-dilution levy” representing a provision for market spreads (the difference between the prices at which assets are valued and/or bought and sold), duties and charges and other dealing costs relating to the acquisition or disposal of assets and to preserve the value of the underlying assets of a Fund as a result of material net subscriptions or redemptions.

² As at 31 March 2021. The ongoing charges figure is capped at 0.90% p.a. The charges exclude portfolio transaction costs. Any amount above 0.90% p.a. will be paid by the Investment Manager.

For more information on charges, please see the Prospectus, which is available at maple-brownabbott.com.au.

Past performance

Maple-Brown Abbott Asia Pacific-Ex Japan Fund Performance (in GBP) as at 31 December 2021

- Past performance is not a guide to future performance.
- The Fund's performance is based on the movement in net asset value per share and is net of applicable tax and all fees and charges (excluding entry and exit charges).
- The graph shows the annual performance of the Fund in GBP since January 2012.
