This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM North American Growth

hereafter the "Fund", a sub-fund of GAM Funds.

Institutional GBP accumulation - GBP (the "Share Class") **ISIN: GB00B6TTG122**

ACD: GAM Sterling Management Limited part of GAM Group AG.

Objectives and investment policy

- The aim of the sub-fund ("Fund") is to provide capital growth.
- The fund seeks to achieve this objective through investing primarily in North American equities. At least 65% of the Fund's investments are in a concentrated portfolio of North American equities. North American equities means shares of issuers that have their registered office in the USA or Canada or that have the predominant part of their commercial activity in the USA or Canada or, as holding companies, must predominantly hold stakes in companies with their registered office in the USA or Canada. This condition must be met in addition to the investments being listed on a stock exchange in the USA or Canada.
- The fund manager selects companies on the basis of rigorous company research and will not employ any industry or market cap bias. Companies are selected on merit, regardless of market outlook.
- The Fund may also invest in other equities, fixed interest securities, convertible bonds, collective investment schemes, money market instruments, warrants, cash, near cash and deposits.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Any income arising from this Share Class will be accumulated. Other share classes of the Fund may distribute income.
- The Fund is actively managed and it does not refer to any benchmark index. The fund manager uses their expertise to pick investments to achieve the Fund's investment objective.
- The Fund may only use a limited number of simple derivative instruments and forward currency contracts and may enter into stocklending and subunderwriting arrangements in order to enhance performance and/or manage risk within the Fund's portfolio. A forward currency contract is a binding contract that locks in the exchange rate for the purchase or sale of a currency on a future date. It is essentially a hedging tool that aims to protect against fluctuations in currency prices.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently from in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Concentration Risk:** concentration in a limited number of securities and industry sectors may result in more volatility than investing in broadly diversified funds.
- **Capital at Risk:** all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed
- **Investment Positions:** positions may increase in size relative to the size of the Fund. The risk is monitored by regularly adapting positions.
- **Equity:** investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.

The "Investment Objectives and Policy" section of the Prospectus for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.
