All companies in which investments are made follow good governance practices as set out in the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption;

- invest at least 10% of its Net Asset Value (NAV) in companies that meet the definition of sustainable investments under SFDR and exclude companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an

environmental or social perspective. All companies in which investments are made follow good governance practices.

The Fund may:

- invest significantly in small and mid-sized capitalisation companies;
- invest more than 40% of its Net Asset Value (NAV) in emerging market countries;
- get indirect exposure to commodities by investing in financial indices;
- invest up to 10% of its Net Asset Value (NAV) in other collective investment schemes including exchange traded funds; and
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income.

Risk and Reward Profile

Lower risk Higher risk
Potentially lower reward Potentially higher reward

1 2 3 4 5 6 **7**

We have calculated the risk and reward indicator, as shown above. As this Fund has less than 5 years performance data available, it is based on simulated volatility. It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 7 because its simulated historical value has shown very high volatility. With a Fund rating of 7, you have a very high risk of losing money but your chance for gains is also very high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect ("Stock Connect") risk: The Fund may invest in China A shares through Stock Connect programmes. These may be subject to regulatory changes and quota limitations. An operational constraint such as a suspension in trading could negatively affect the Fund's ability to achieve its investment objective.

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Emerging Markets Risk: Emerging Markets have additional risks due to less-developed market practices.

Market Capitalisation Risk: Investments in the securities of small to medium-sized companies (by market capitalisation) may be riskier and less liquid (i.e. harder to sell) than large companies. This means that their share prices may have greater fluctuations.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Blockchain Innovation Companies Risk: The value of securities of Blockchain Innovation Companies may be negatively impacted by changes in regulation and are dependent upon consumer and business acceptance of the distributed ledger technology. Distributed ledger technology is a new and relatively untested technology which could be

vulnerable to fraud. The Fund's value may be more subject to risks of developing technologies, competitive pressures and intellectual property rights challenges.

Environmental, Social and Governance (ESG) Investment Approach

Risk: The Fund follows an ESG investment approach. This means factors other than financial performance are considered as part of the investment process. This carries the risk that the Fund's performance may be negatively impacted due to restrictions placed on its exposure to certain sectors or types of investments. The approach taken may not

reflect the opinions of any particular investor. In addition, in following an ESG investment approach, the Fund is dependent upon information and data from third parties (which may include providers for research reports, screenings, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
