IFSL Tilney Bestinvest Defensive Portfolio Clean

A Sub-fund of the IFSL Tilney Bestinvest Multi Asset Portfolio (ISIN Income: GB00BFPBZK77) (ISIN Accumulation: GB00BFPBZL84)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim is to increase the value of your investment over the long term while maintaining low volatility* levels.

*Volatility is the measurement of the movement in the price of shares over a period of time. Very broadly, a Fund with a higher level of volatility is considered a higher risk investment than one with a lower level of volatility.

The Fund is actively managed and invests in a mixture of other collective investment schemes, (including investment Funds which have an objective similar to that of the Fund, investment trusts and investment companies), tradable debt (bonds), shares, property, cash, bank deposits and money market instruments (a range of short-term financial products which can be easily bought and sold on money markets). The Fund invests in assets worldwide with no restriction to any particular sector, industry, geographic

location or investment type.

The Fund may buy investments directly or may buy shares in other investment products which themselves buy these investments or may invest through the use of structured products (investments which provide a return linked to the performance of an underlying investment).

The Fund may use financial contracts (derivatives) to help achieve its aim and to manage risk, reduce costs and improve results.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets. Stock Market prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has significant exposure to bonds, the prices of which will be impacted by factors including: changes in interest rates, inflation expectations and perceived credit quality.
- When interest rates rise, bond values generally fall. This risk is generally

greater for longer term bonds and for bonds with higher credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

The Fund may invest a large part of its assets in other Funds for which investment decisions are made independently of the Fund. If these investment managers perform poorly, the value of your investment is likely to be adversely affected. Investment in other Funds may also lead to duplication of fees and commissions.

Risks which are not adequately captured by the risk indicator include:

- The insolvency of any institution providing services, such as safekeeping of assets or holding investments with returns linked to financial contracts (known as derivatives), may expose the Fund to financial loss.

All or part of the fees and expenses may be charged to the capital of the Fund rather than being deducted from income. Future capital growth may be constrained as a result of this.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/08/2018. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the non-UCITS retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.

Past Performance

Historic performance to 31 December 2018

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

The Fund was launched in September 2008.

This share class was launched on 13 November 2013.

In the period to 13/11/2013, past performance is represented by the Fund's Retail class shares.
