

Non-UCITS Retail Scheme Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Margetts Providence Strategy Fund Acc (GB0007938490)

The Fund is managed by Margetts Fund Management Limited.

Objective and Investment Policy

Investment Objective

The objective of the Margetts Providence Strategy Fund is to provide a balance of capital growth over any five year period and increasing income (measured by annual monetary distribution per unit). Capital and the income distributed are at risk and there is no guarantee that the objective will be achieved.

How will the objective be achieved?

The Fund will invest in regulated collective investment schemes (which may include schemes operated by the manager, associates or controllers of the manager), in any economic sector and any geographic area, across a wide range of assets. This includes shares, bonds, cash and near cash instruments.

A minimum of 70% of the portfolio will be invested in regulated collective investment schemes to provide a minimum of 30% and a maximum of 60% exposure to shares. A minimum of 50% of the portfolio will be invested in assets which are denominated in Sterling or hedged back to Sterling.

Portfolios are constructed from a long-term (Strategic) asset allocation, which may change gradually over time as the composition and return profile of global investment markets evolve. To ensure that it is reasonable to have expected the allocation to meet the stated objectives and risk profile, the Strategic asset allocation is modelled or back tested over several decades. Based on the team’s assessment of the portfolio and current economic and investment conditions, adjustments will be made to create a short-term (Tactical) asset allocation. Limits are applied on how much the manager can change the asset allocation at any one time with the aim that the Fund maintains the objectives stated above.

The Manager will charge the annual management fee to the Fund’s capital account. This will increase the distributable income by that amount and reduce the capital by a similar amount. This may constrain capital growth.

Management Style

The Fund is actively managed, meaning that the manager selects investments, rather than tracking a stock exchange or index.

Derivative Use

The use of derivatives and/or hedging transactions are permitted in connection with the efficient portfolio management (managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth or both).

General

Shares in the Fund can be bought and sold daily (every Business Day of the Fund). If you invest in income shares, income from investments in the Fund will be paid out to you. If you invest in accumulation shares, income will be retained in the value of your shares.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free.

The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls). The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.

The following risk factors are relevant to the overall risk profile of the Fund. A full description of risk warnings is provided in the prospectus, which is available on our website, or by requesting a copy.

Exposure to currencies other than the base currency is subject to currency fluctuations which could add to the rise and fall in value of investments.

Investments in collective investment schemes may provide a higher level of diversification but may also increase costs. The underlying collective investment schemes may also experience operational or credit issues which could impact liquidity (the ability to sell) or capital value.

Exposure to various asset classes may include some assets that are considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments, or that they may take longer to sell. In addition, the way in which these assets interact with each other may change through time causing higher or lower fluctuations of value.

There may be a significant exposure to cash or money markets. If investment markets generally rose during this period, against expectation, then returns would be reduced.

The objective, policy and strategy set out above should align with the objectives of the investors and their minimum timeframe for investment.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	0.00%

Charges taken from the Fund over a year	
Ongoing Charges	2.00%
Performance Fee	0.00%

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on the last year's expenses (or reasonable estimate where Fund has not been operating for a full calendar year), for the year to 31 Dec 2023 and this figure may vary, year to year. It excludes portfolio transaction costs.

For further details on the calculation of the charges please refer to the Fund's prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs except entry and exit charges and it is inclusive of net reinvested income.

The Fund was launched on 27 Jan 1995.

The share class was launched on 27 Jan 1995.

The performance is calculated in pounds sterling.

Practical Information
