Investec Target Return Bond Fund

A sub-fund of Investec Funds Series iv managed by Investec Fund Managers Limited

Class I Income shares in sterling
ISIN: GB00B71DHL68

Objectives and investment policy

The Fund aims to produce a positive performance return above overnight GBP LIBOR (an interbank lending rate) over rolling 3 year periods regardless of market conditions. The Fund targets a return of overnight GBP LIBOR +2.5% (gross of fees) per annum over rolling 3 year periods. While the Fund aims to achieve a positive return and its performance target, there is no guarantee either will be achieved over rolling 3 year periods or over any period of time.

The Fund invests around the world primarily in a wide range of bonds (contracts to repay borrowed money which typically pay interest at fixed times) issued by companies, institutions or governments and in their related derivatives (financial contracts whose value is linked to the price of an underlying asset). The Fund will not invest in shares or in their related derivatives.

The Fund may invest in other assets such as cash, money market instruments (tradable securities where money can be invested for short periods), other funds (which may be managed by the Investment Manager, other companies in the same group as the Investment Manager or a third party) and other derivatives.

Derivatives may be used for investment purposes (i.e. in order to achieve the Fund's investment objectives) or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

Returns could be from income or growth or a combination of the two.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The Fund cannot replicate the benchmark index (LIBOR is an interbank lending rate). The Investment Manager is free to choose the investments of the Fund and these will not resemble the components of the benchmark index.

Any income due from your investment is paid out to you quarterly.

You can buy or sell shares in the Fund on any Dealing Day in the UK, as defined in the definitions section of the Investec Funds Series Omnibus prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the lower end of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market: These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus. Currently, it is expected that the Fund will exceed this limit in securities issued by the US government.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

The full list of the Fund's risks are contained in the appendices of the Investec Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges, as there has been a change to the charging structure. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Investec Funds Series omnibus prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for performance comparison purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 10 October 2005 and this share class on 2 May 2012.

- (1): Performance has been simulated for this period based on a longer established share class
- (2): Due to an investment policy and name change on 07 April 2017, performance was achieved under different circumstances
